Splice Explores - Vocoder Vapors - Samples & Loops: Samuel Vaile, known as sv1, is a Texan-based experimental sound producer and designer. He is famous in the music industry for his EP debut, an Amorphous "field study" via Curiosity Shop, and his organic sound Design Masterclass via Lux Cache that takes the listener on a journey through a digital and underwater soundscape.

The Explores package sv1 synthesized the sounds from nature, tracks of water footsteps, and household objects (basically anything he could gain access to) and then processed them using an Octave. The result is a spooky sub-world of textures, harmonies, and melodic sounds that sound like an apocalypse rendered in digital form. When the dust has taken away from the vocoder's ruin, look at the distinct samples to find unique and distinctive sounds that differentiate your work from other artists.

How can we create atmospheric textures and environmental sounds in music productions?

You can use "Splice Explores - Vocoder Vapors - Samples & Loops."

Where can I download the product?

After subscription, You can download it for free from here.
