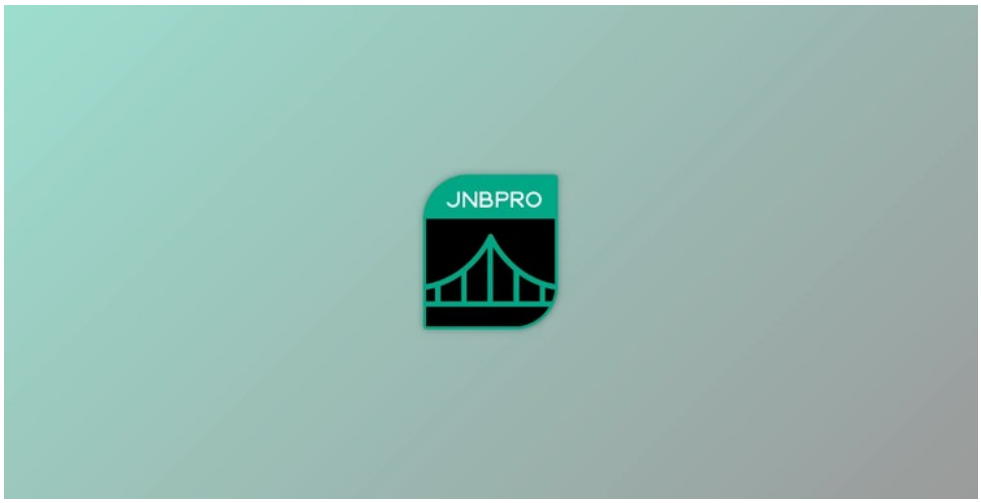
JNBridgePro v10.10 (OEM)

2026-08-31 13:51:30



Connect anything Java with whatever .NET. Reuse your current C#, VB, or Java code, and run your software everywhere.

Access your Java-based and .NET-based (C#, VB) parts working together fast and easily using JNBridgePro.

- Access Java courses from .NET like Java were a .NET speech (C#, VB, etc.).
- Access .NET courses (written in C#, VB, F#, etc.) out of Java-like they were Java classes.
- Gain complete access to some API on the opposite side, while it's service-enabled or not.
- Indices any Java or .NET binary, no source code demanded.
- Deploy everywhere: at precisely the same procedure, in a different procedure, on various machines, across a network, on-premises, or at the cloud.

Want to modify your program's architecture? Just alter a configuration file, your code stays untouched.

- Embed AWT or Swing Java widgets in .NET WinForm applications.
- Embed AWT or Swing Java widgets in WPF (Windows Presentation Foundation) programs)
- Embed .NET WinForm controls in Java AWT, SWT, or Swing programs.
- Embed WPF (Windows Presentation Foundation) controls in Java AWT, SWT, or even Swing apps
- Cross-platform exception handling
- Integrated thing lifecycle management
- Garbage collection
- Datatype conversions
- Marshalling and unmarshalling of items
- Reference and communications management

JNBridgePro Amazing Attributes:

Gain complete access to some Java or even .NET API on the opposite side, while it's services-enabled or not. Indices any Java or .NET binary, no source code required!

Solve your Java & .NET cross-platform interoperability issues efficiently so that you can concentrate on what matters.

JNBridgePro is 100′s-1000′s times quicker than services. It is ideal for when performance issues.

JNBridgePro gets incompatible compatibility, which means you don't need to. Calls to Java code out of .NET or require .NET code from Java will appear like native neighborhood codes.

You do not have to forfeit utilizing the best elements for almost any work simply as they were composed for another stage.

Lower your up-front development expenses. Preserve your existing investments. Save long-term care costs by maintaining the first Java or .NET source code unaffected.

所有软件资源 100%安全 已检测 无病毒 无篡改
