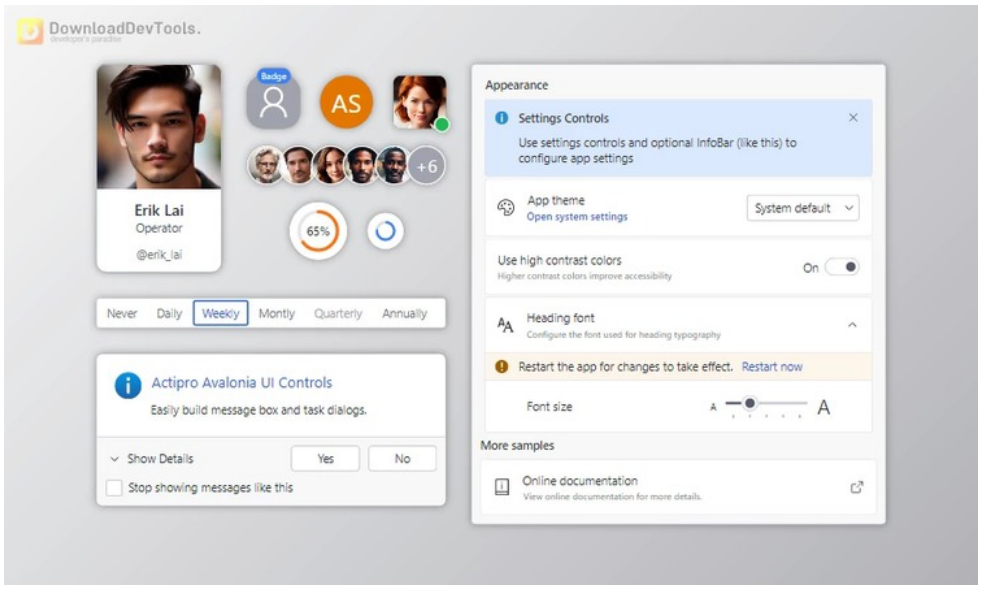
Actipro Software Avalonia Controls v25.2.1 (25 Aug 2025)

2025-11-10 10:29:45



is a modern set of feature-rich controls that help developers create amazing, functional, and cross-platform Avalonia applications. It comes with a free set of themes, UI controls for basic usage, and a complete set of Pro controls, which introduces more advanced capabilities. These tools save time and effort with polished results, whether used to create a professional application or add usability to them as Office-like features.

Also, one of its stand-out features is its advanced ribbon controls that take cues from modern Office designs. The ribbon brings commands together in one intuitive layer—no matter what size screen you're on. Developers also choose between classic and simplified layouts, customizable galleries for color and others, and tools like screen tips and key tips for usability. It also comes with further settings such as UI density, standalone toolbars, and full MVVM support to customize every part of the interface to serve your app best.

Past the ribbon, **Actipro Software Avalonia Controls** features a broad collection of fundamental UI controls, making working with the interface easier. Every control — from dynamic progress bars and beautiful cards to customizable avatars and badges — is built for aesthetics and functionality. This also allows developers a lot of tools for user prompts, grouping settings, and flexible bars that allow apps to feel modern and intuitive.

Key Features of **Actipro Software Avalonia Controls** :

1. **Ribbon Controls:** Office-style ribbons with dynamic layouts and keyboard navigation.
2. **Galleries:** Customizable galleries for colors, symbols, and text styles in menus or ribbons.
3. **UI Density Options:** Compact, normal, and spacious layouts for various user preferences.
4. **Standalone Toolbars:** Flexible toolbars that host ribbon controls with overflow support.
5. **Screen and Key Tips:** Enhanced tooltips and easy keyboard shortcuts for faster navigation.
6. **Settings Controls:** Card-based layouts for intuitive configuration of app settings.
7. **Circular Progress Bar:** Animated progress indicators with determinate and indeterminate states.
8. **Avatar and Badge:** Represent users or items with avatars and badges for notifications or counts.
9. **Full MVVM Support:** Design entire UIs using MVVM with a companion library for bindings.
