FlowHeater v4.5.6 for Win

2026-07-13 20:31:48

FlowHeater is a robust software solution designed for seamless data integration and transformation. Our goal is to provide efficient data transfer, whether you need to convert data between different systems, prepare it for external resources, or handle complex data processing tasks. supports a variety of data sources and formats, including text files, XML, JSON, MS Excel, MS Access, MS SQL Server, MySQL, Oracle, ODBC, SQLite, PostgreSQL, RestAPI, and more.

Our user-friendly interface, featuring a drag-and-drop design, allows you to combine data from diverse sources and convert it into the desired format without requiring programming skills. With **FlowHeater**, you can perform calculations, make conditional changes to the data, and seamlessly integrate your data.

Flexibility is at the core of **FlowHeater**, enabling you to convert data formats such as CSV, Excel, XML, and various database formats. Whether merging large datasets, executing complex data manipulations, or simplifying routine processes, **FlowHeater** offers complete control over your data, allowing precise transformation according to your needs.

Optimizing data processing is made easy with **FlowHeater**, saving you valuable time. The software facilitates the creation of customized data mappings that can be executed manually. Additionally, you can automate data integration processes using scripts or run them in the background with our optional server solution. With **FlowHeater**, you have the flexibility to tailor and enhance your data processing tasks according to your specific requirements.

Key Features of **FlowHeater** :

1. Wide range of supported data sources and formats
2. Seamless data connectivity and combination from various sources
3. An intuitive drag-and-drop interface, no programming skills required
4. Flexible data conversion for CSV, Excel, XML, and various database formats
5. Precise control over data transformation
6. Time-saving data processing capabilities
7. Customized data mappings for efficient processing
8. Ability to perform calculations and apply conditional changes to data

所有软件资源 100%安全 已检测 无病毒 无篡改
