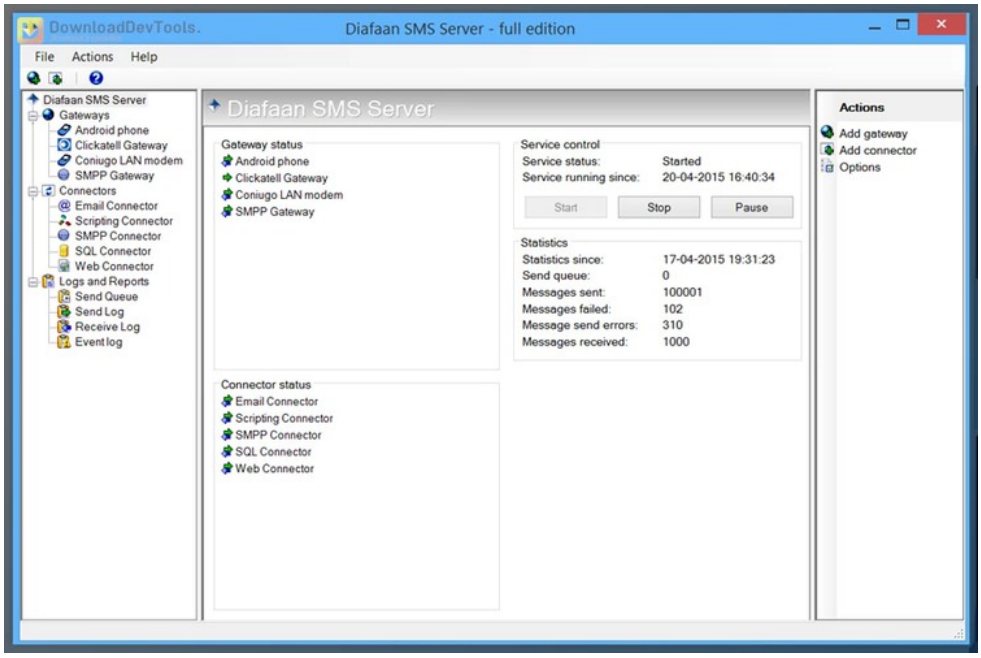
Diafaan SMS Server v4.9.1.0 (05 Aug 2025) Full

2025-08-08 10:25:47



Diafaan SMS Server is an easy-to-use software designed for Windows, letting you send and receive text messages through various devices and services. It works with 4G/3G/GSM modems, Android phones, and online SMS providers that support popular standards like SMPP and HTTP API. Businesses can easily connect with BulkSMS, ClickSend, Twilio, and others to set up SMS messaging for customer notifications, alerts, or reminders, with a straightforward 30-day free trial to explore all features.

With , you can manage messages directly from your browser. The software has a built-in web app, allowing you to send SMS, organize contacts, create groups, and view received messages with just a few clicks. Additionally, Diafaan integrates well with databases like MySQL, Microsoft SQL Server, and Oracle, enabling you to send messages from your database and store SMS data for analysis or records. For email integration, it connects to Microsoft Exchange Server or any other email client, allowing you to send SMS from your email inbox and receive replies straight to your email.

Diafaan SMS Server also offers several ways for developers to integrate SMS into their applications with API support for HTTP, SMPP, SQL, SMTP, POP, and command-line access. This makes it simple to set up a reliable SMS gateway for various business needs, from marketing to customer support. It's a powerful, versatile solution designed to make SMS messaging accessible and manageable for all levels of IT experience.

Key Features of **Diafaan SMS Server** :

1. Browser-Based SMS Management: Use an easy web app to send and view SMS, manage contacts, and set up groups from any browser.
2. Database Integration: Compatible with databases like MySQL and Microsoft SQL, allowing automated SMS sending and message storage within your database.
3. Spreadsheet Import: Effortlessly import messages from Excel or CSV files and export SMS logs to streamline message management.

所有软件资源 100%安全 已检测 无病毒 无篡改
