Newborn Essentials Photoshop Actions Photoshop: Its Newborn Studio Collection is the most sought-after set for professionals in every field. It was designed by the award-winning newborn photographer Amy McDaniel of Dewdrops Photography. It's gone are the days of Manual Frequency Separation! We've automated the process of frequency separation and made it the Magic Smoother brush that evens the skin tone without affecting the texture. We've also incorporated several recent software updates to make the most user-friendly Retouch toolkit in the world. The other highlights of this set include Flawless One-Click Foundations, artistic Color Grading, Dynamic Studio Light Simulation, and advanced finishing Effects. It is without a doubt that it's the sole Newborn Action Set you will ever require.

- 88 Actions Included
- Easy-To-Follow Explanations and Guides Built Within Each Action
- Files for Photoshop CS2-CS6, Creative Cloud (CC), and Elements 13-23 Included
- Detailed Installation Instructions Included
