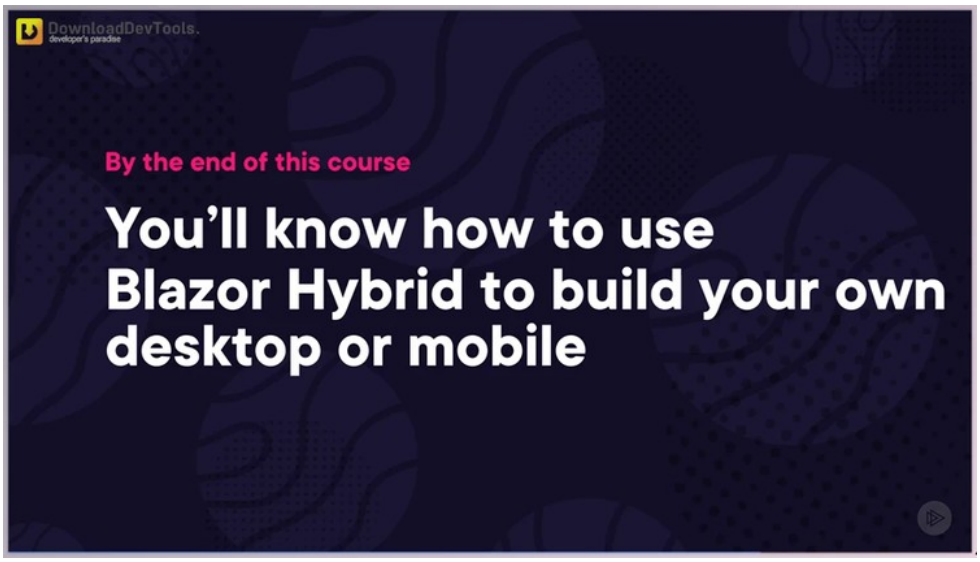
Building Blazor Hybrid Apps - Thomas Claudius Huber

2026-09-02 21:31:32



Embark on a journey to master Blazor Hybrid, the revolutionary framework enabling the creation of native mobile and desktop applications using HTML and C#. In the instructor guides you through the intricacies of leveraging Blazor, .NET MAUI, WPF, and Windows Forms to craft robust cross-platform solutions.

Discover the power of Blazor Hybrid as you unlock the ability to harness your existing HTML, C#, and Blazor expertise to build applications for Android, iOS, macOS, and Windows. Through **Building Blazor Hybrid Apps - Thomas Claudius Huber**, you'll delve into creating .NET MAUI Blazor apps, implementing Razor components, leveraging Razor class libraries for seamless component sharing, and integrating authentication and authorization features.

With practical insights into using Blazor Hybrid within WPF and Windows Forms environments and guidance on the publication process, you'll emerge equipped with the skills and knowledge essential for developing dynamic mobile and desktop applications with HTML, C#, and the Blazor web framework.

Building Blazor Hybrid Apps Table of contents:

1. Course Overview (Duration: 1 minute)
2. Understanding Blazor Hybrid (Duration: 9 minutes)
3. Creating a .NET MAUI Blazor App (Duration: 24 minutes)
4. Implementing Razor Components (Duration: 22 minutes)
5. Working with Razor Class Libraries (Duration: 29 minutes)
6. Adding Authentication and Authorization (Duration: 42 minutes)
7. Using Blazor Hybrid in WPF and Windows Forms (Duration: 43 minutes)
8. Publishing Your Application (Duration: 10 minutes)
