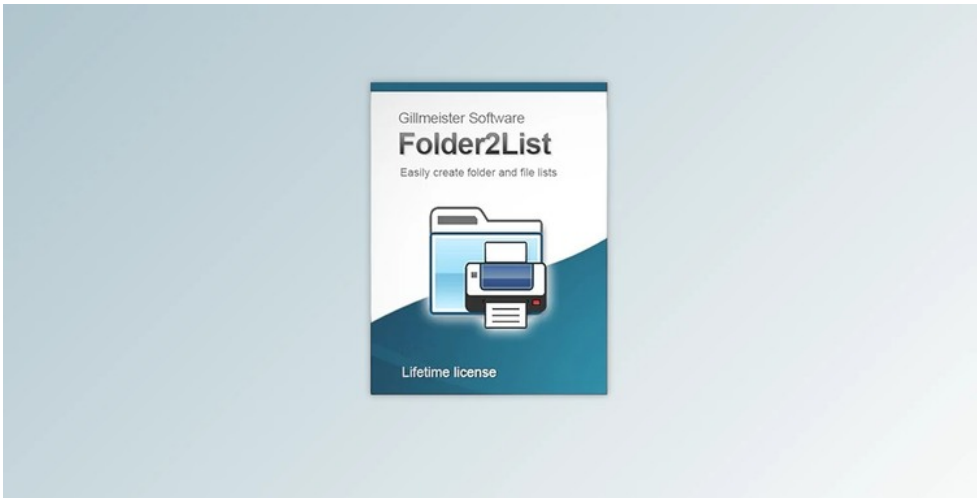
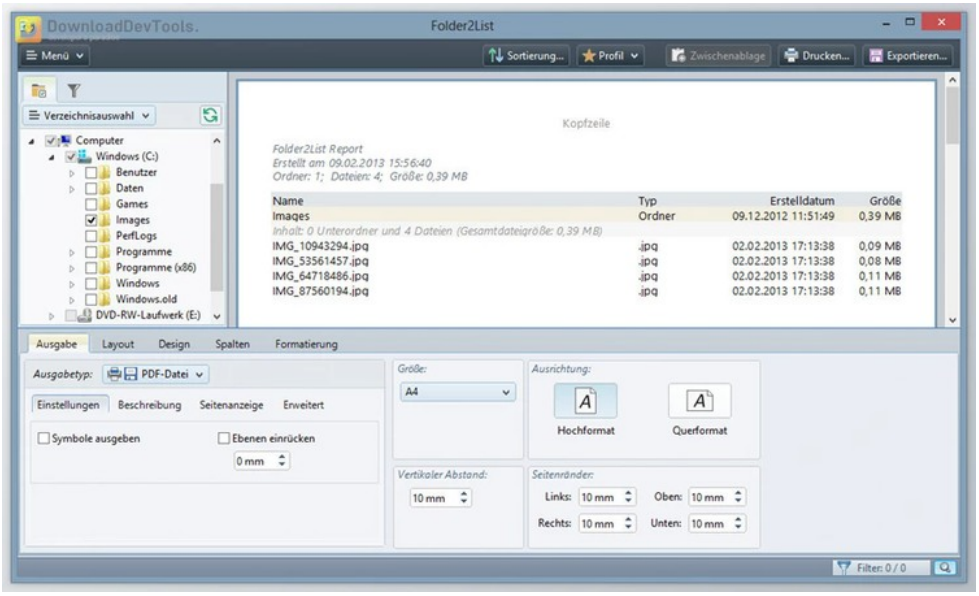
Gillmeister Folder2List v3.28.7

2025-07-17 16:05:43





is a powerful tool that lets you quickly and easily create detailed lists of your folders and files. Whether you need a simple list of file names or a comprehensive report including metadata like EXIF for photos, ID3 tags for music, or document properties, Folder2List has you covered. The program allows you to customize the appearance of your lists with options for fonts, colors, and frames, which you can save as profiles for future use.

One of the standout features of **Gillmeister Folder2List** is its ability to handle a wide variety of file properties and metadata. You can generate lists that include specific details about your files, such as the artist and album for MP3s, the resolution and camera model for photos, or the author and revision number for documents. These lists can be printed or exported in multiple formats like XLS, PDF, HTML, CSV, and TXT, making it easy to share or further process the information.

Gillmeister Folder2List also offers advanced filtering and sorting options, allowing you to tailor your lists to your exact needs. You can filter files and folders by attributes like size, date, and metadata and combine multiple criteria for precise results. Additionally, the program supports automated list creation through command-line mode, enabling you to generate lists on a schedule via scripts. With real-time previews, you can instantly see how your changes affect the output, ensuring your lists look just the way you want.

Key Features of **Gillmeister Folder2List**:

1. Use numerous file and folder properties
2. Include metadata (EXIF, IPTC, ID3, etc.)
3. Customize list appearance (fonts, colors, frames)
4. Print and export lists (XLS, PDF, HTML, CSV, TXT)
5. Real-time preview of list changes
6. Extensive filtering and sorting options
7. Automated list creation via command line
8. Save settings as profiles for easy reuse
