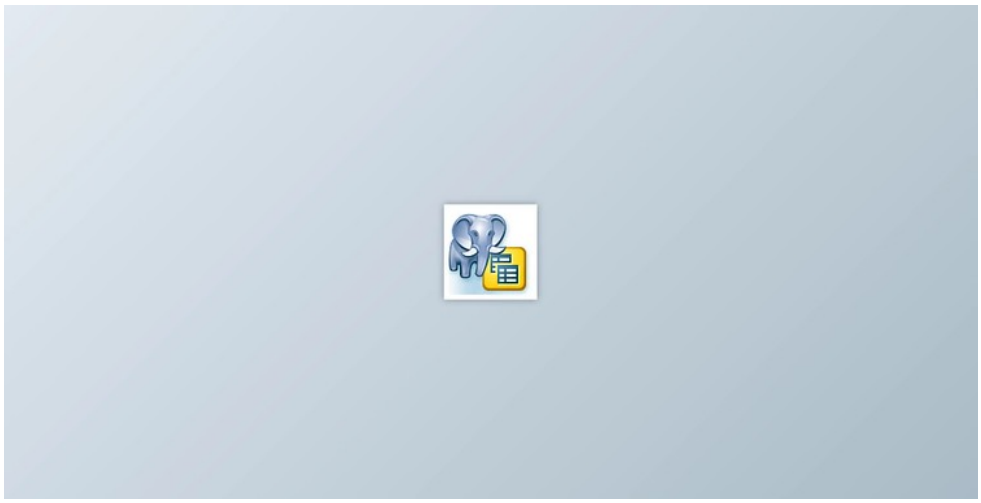
SQL Maestro PostgreSQL Data Sync v16.4.0.6 (23 Jan 2019) Multilingual

2025-03-03 10:47:04



PostgreSQL Data Sync is a strong and easy-to-use instrument for database contents contrast and synchronization.

With all these attributes, our program becomes the ideal option for database administrators, programmers, and testers who need a fast, easy, and reliable method to synchronize and compare PostgreSQL data.

SQL Maestro PostgreSQL Data Sync Great Features:

- Cross-DBMS data contrast
- Native support for many popular data resources
- Comparing and synchronizing database contents
- Automated production of error-free synchronization scripts
- Easy-to-read gap display
- Saving all choices to a job file for Immediate re-execution
- Custom comparison keys and elastic auto-mapping tools
- Complete control over the contrast and synchronization
- Strong command-line port for constant integration
