AntiPlagiarism.NET v4.158 (20 May 2026)

2026-05-27 22:27:57

AntiPlagiarism.NET is an automated digital plagiarism detection program specifically designed to identify content copied from the web. It harnesses the vast database of search engines like Google and Bing to conduct thorough checks while ensuring that the documents being reviewed remain securely on the user's computer. With a focus on accuracy, it determines the uniqueness percentage of the text and highlights non-unique phrases using colour-coded markings for easy identification.

This versatile tool offers batch-checking capabilities and supports website analysis, catering to various plagiarism detection needs. Users benefit from advanced preferences, including predefined check settings like Default, Express, and Deep, ensuring flexibility in detecting copied content. With support for multiple formats such as doc, docx, pdf, odt, html, txt, and rtf, **AntiPlagiarism.NET** accommodates diverse document types commonly used in academic and professional settings.

serves as a vital resource for students and educators, helping to uphold academic integrity standards by detecting and addressing plagiarism effectively. Its user-friendly interface simplifies the process, while proxy list support enhances privacy and security during usage. By leveraging this tool, users can improve the originality and quality of their writing, mitigating the risks associated with unintentional plagiarism and ensuring academic success.

Key Features of **AntiPlagiarism.NET** :

1. Automated digital plagiarism detection

所有软件资源 100%安全
