ActiveData for Excel v5.0.508

2025-01-06 23:31:00

ActiveData For Excel is a professional add-in that enhances the functionality of Microsoft Excel by equipping it with powerful data analysis features. This versatile tool empowers users to perform tasks such as summarizing, merging, matching, querying, and more on their Excel worksheets. ActiveData For Excel can process up to one million rows of data with remarkable speed.

By integrating ActiveData For Excel, you can leverage advanced data analytics capabilities and time-saving management features for workbooks and worksheets. This user-friendly package offers a comprehensive set of over 100 features, many designed to boost productivity when working with Excel.

One significant advantage of ActiveData For Excel is its affordability, providing feature-rich data analysis tools at a fraction of the cost compared to competitive database-driven data analytics and computer-assisted audit tools (CAATs).

Moreover, the skills acquired using ActiveData For Excel are transferable to other data analysis software packages and CAATs like ACL and IDEA, making it an excellent choice for technical and non-technical users. It seamlessly complements these software packages and is well-suited for those looking to enhance their data analysis capabilities.

ActiveData For Excel comes in Business and Professional editions and is compatible with Microsoft Excel versions from 2007 to 2021, including 64-bit and Office 365. Additionally, it offers French, German, and Japanese versions to cater to a broader user base.
