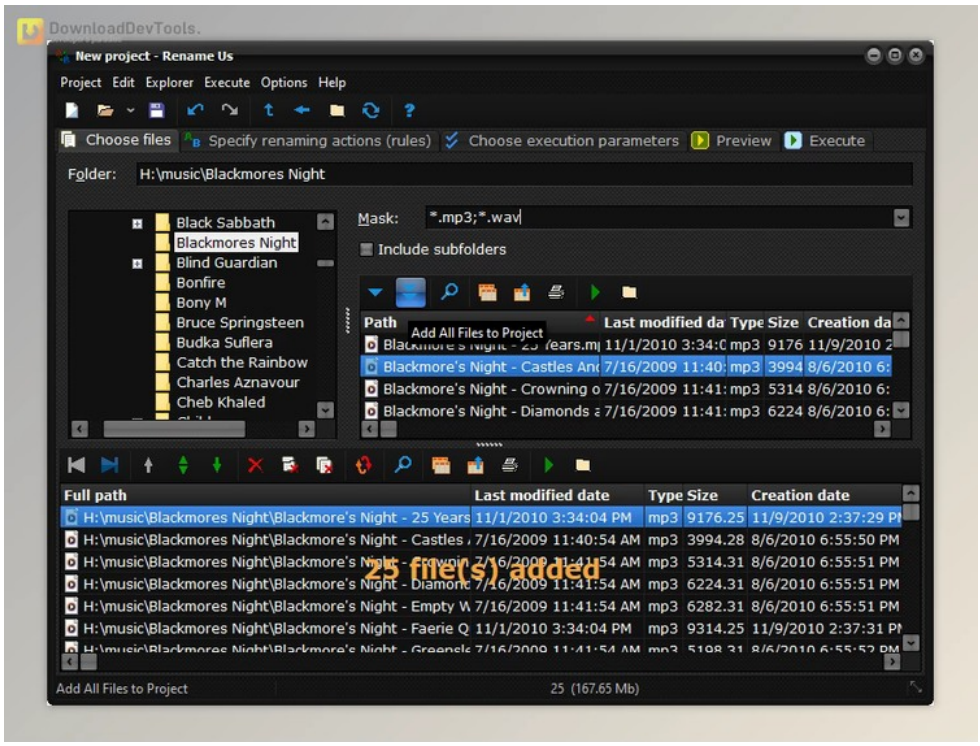
Rename Us Pro v5.0.2.356

2026-08-28 10:13:36



Windows users can use the **Rename Us Pro** software as a flexible and intelligent application that lets them rename and copy multiple files efficiently. The program enables bulk renaming that accepts a range of customizable rules such as prefix or suffix additions or capitalization changes, text replacements, numerical insertion options, complex expression naming through file metadata and MP3 tags, and OS attributes. Users can preview the application of changes, while a testing mode lets them verify accuracy. With this tool, users can arrange files manually, or the tool sorts files automatically according to name, date, or file type.

The professional version of enables users to merge files; furthermore, it provides file list export capabilities through Excel and HTML formats and command-line task execution for automation purposes. The tool provides an effortless solution to streamline your organization of music files, manage documents, and efficiently process bulk image renaming tasks.

Key Features of **Rename Us Pro** :

1. **Customizable Renaming Rules –** Add/remove prefixes & suffixes, change case, replace text, add numbers, and modify extensions.
2. **Advanced Expression –** Based Renaming – Use file metadata, system attributes, and arithmetic functions for complex renaming.
3. **Full Preview & Test Mode –** See how file names change before applying them.
4. **File Sorting & Organization –** Arrange files manually or sort by name, date, or type.
5. **Batch File Merging –** Combine multiple files into one (Pro version).
6. **Export File Lists –** Save file lists in Excel, HTML, and other formats.
