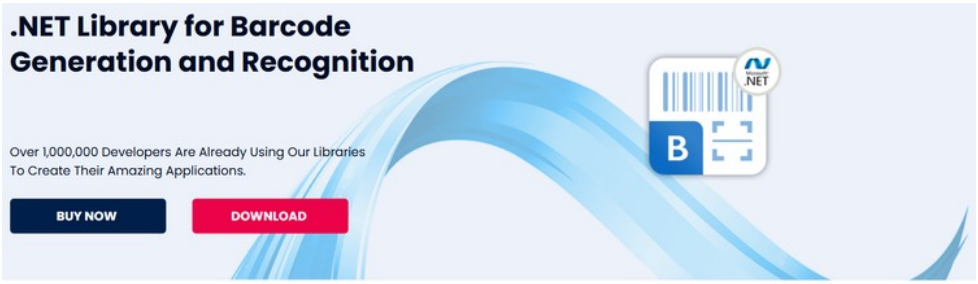
Spire.Barcode for .NET v10.2.0 (28 Feb 2025)

2026-07-13 20:54:27



Spire.Barcode for .NET is a professional barcode library specially designed for .NET developers (C#, VB.NET, ASP.NET, .NET Core, .Net Standard, .NET 5.0, MonoAndroid, Xamarin.iOS) to generate, read and scan 1D & 2D barcodes. Developers and programmers can use Spire.Barcode to add Enterprise-Level barcode formats to their .net applications quickly and easily.

Spire.Barcode for .NET provides a very easy way to integrate barcode processing. With just one line of code to create, read 1D & 2D barcode, Spire.Barcode supports variable common image formats, such as Bitmap, JPG, PNG, EMF, TIFF, GIF and WMF.

Compared with the *Free* Spire.Barcode, the commercial edition of Spire.Barcode supports more barcode types and the scan speed has been improved significantly.
