

VisualSVN Server Enterprise v5.0.2 (07 Jun 2022) for Win x86 & x64 + CRACK

2025-01-30 13:01:19 label 我要反馈 下载页面

VisualSVN Server permits you to easily set up and handle a fully-functional Subversion server on the Windows platform. Due to its robustness, unbeatable usability, and exceptional enterprise-grade attributes, VisualSVN Server helps small business and corporate customers.

VisualSVN Server is a freewareApache Subversion server bundle for Windows. The bundle was created and implemented to offer Subversionversion management as a first-class citizen program at an Active Directory environment. VisualSVN Server is a standalone product that installs in a few clicks and functions from the box. The paid Business Model of VisualSVN Server offers tighter integration with the Active Directory environment and Multisite Repository Replication attribute.

VisualSVN Server Great Features:

- Active Directory Single Sign-On
- Multisite Repository Replication
- Backup and Restore
- HTML5-powered Internet Interface
- PowerShell Scripting and Automation
- Repository Management Delegation
- Remote Server Administration
- Access and Operational Logging
