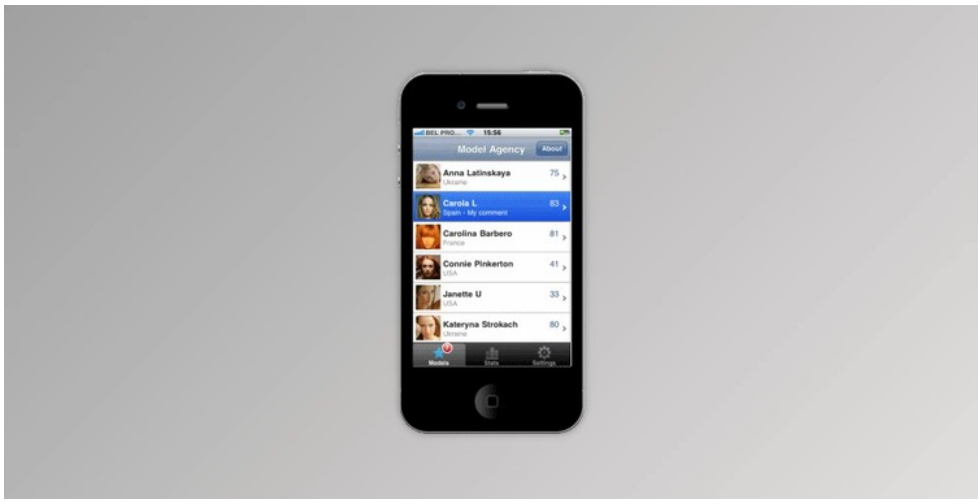
TMS IntraWeb iPhone Controls Pack v2.6.3.0 (18 Oct 2021) for Delphi 2009-11 Alexandria Full Source

2025-01-06 23:57:52



TMS IntraWeb iPhone Controls package Place of IntraWeb elements to make web applications for mobile devices such as iPhone, iPad, Android that provide a look & feel quite near-native software.

Being designed as a method of building strong web applications that may operate on mobile devices, TMS IntraWeb iPhone Controls Bundle suggests a wide selection of IntraWeb elements that should cater to any programmer's needs. All the more so since it provides support not just for iOS handsets but also Android mobiles and guarantees almost native appearances for your applications.

Up to 20 distinct elements lie in the heart of the TMS IntraWeb iPhone Controls Package. Because of the shortage of space, we will not have the ability to share all of them, but in-depth documentation can be found on the developer's site.

TTIWIPhonePopup should be convenient if you want to emulate the popup controller found in iPhones and iPad, whereas TTIWIPhoneEdit was made to replicate the famed curved corners, among other items. TTIWIPhoneSpinner suggests a simple solution for wheel management when it has to do with the time and date selector.

Afterward, as made evident by its own name, TTIQIPhoneMenu will help you work with app menu management whilst TTIWIPhoneGeolocation can regaining a particular place and translating it into longitude and latitude coordinates or street address.

TTIWIPhoneList can help you select between a configuration and a typical list style and promises the ideal iPhone emulation. TTIWIPhoneButton allows you to produce switches whose corners are curved in pristine iPhone style, and TTIWIPhoneRegion suggests a seamless manner of customizing time settings.

TMS IntraWeb iPhone Controls Bundle Great Attributes:

The TMS IntraWeb iPhone Controls Package was designed for and tested by iPhone, iPod Touch, iPad, Android.
