In this course, you'll learn in only two steps how to create your individual mini GIFs to use on social media and within private chat messages so that you can convey exactly what you intend to say.

This course for beginners will teach you how to use Procreate and provide you with the structure within which you'll operate. With the aim to create animations of a minimum of five different stickers, you'll be able to develop and visualize your concepts.

I'll be showing you different animation styles to help you pick the best one for you:

- **Text animated (two variants)**
- **animated shapes, such as the stars and hearts**
- **and more complicated animations**

Additionally, you'll learn the steps to get access to your animated videos using GIPHY after exporting and uploading the images.

With these new skills, you'll not just excel with **your own animation sticker collection** but also gain knowledge about 2D animation that will assist you to become an animator.

This is the class for you if illustration, like stickers and GIFs as well as interested in animation. This course is suitably designed for everyone at any level of proficiency regardless of whether you're a beginner or a professional artist!
