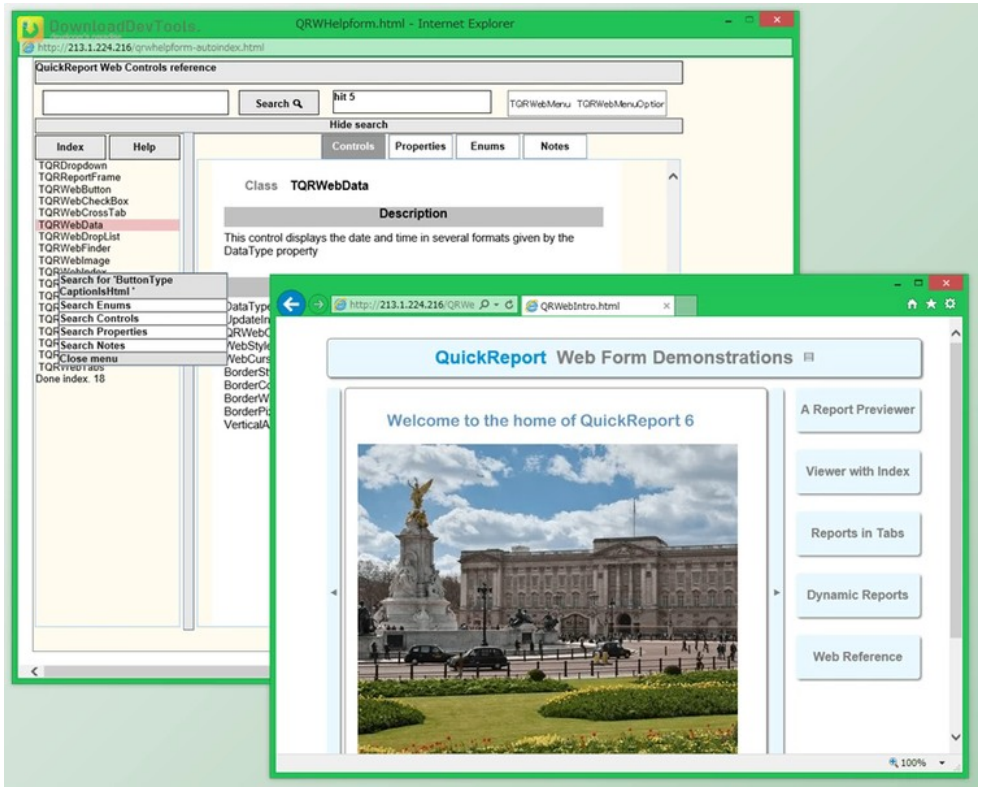
QuickReport Professional v8.0 for Delphi & CB 10.2-12 Athens Full Source

2025-11-14 20:18:34



is a report generation tool that works seamlessly with development environments like Delphi and C++Builder. Instead of requiring a separate report designer, it lets you create reports directly within the same environment where you develop your applications. This tight integration makes it easy to design reports using the familiar form designer, simplifying the development process. Moreover, any application you build using QuickReport is royalty-free, allowing you to distribute it without worrying about extra licensing fees.

The tool connects effortlessly to various data sources, enabling you to pull data from databases and other components within Delphi or C++Builder. Whether you want to print your reports, save them in popular formats like PDF, HTML, and Excel, or stream them directly without temporary files, **QuickReport Professional** offers plenty of flexibility. It's designed to easily handle simple and complex reports, giving you options for customized layouts, backgrounds, and data handling.

QuickReport Professional also includes advanced features that help you optimize performance and fine-tune your reports. For instance, it lets you combine multiple reports into one, customize how reports export, and manage memory usage efficiently. It even offers built-in preview and export controls for reports, making it easier for users to interact with them. With these features, you can create visually appealing, user-friendly reports that integrate smoothly into your applications.

Key Features of **QuickReport Professional** :

1. Integrated Report Designer: Build and design reports directly within the Delphi or C++Builder form designer, offering a streamlined workflow in a familiar environment.

2. Flexible Data Access: Connect to any compatible dataset in Delphi or C++Builder, allowing for easy data integration into your reports without additional configuration.
3. Multiple Export Formats: Generate reports in various formats, such as PDF, HTML, XML, Excel, and more. You can also print directly or use fileless streaming for real-time delivery.
4. Advanced Export Controls: Customize report exports, including support for composite reports (combining multiple reports), backgrounds, and frame settings.
5. Optimized Memory Management: Includes settings that manage memory usage and reduce reliance on temporary files, which is crucial for handling large reports efficiently.
6. Rich Text and Layout Options: Automatically adjust text and layout elements to avoid content breaking awkwardly, and support for exporting complex text as images in formats like PDF and HTML.
7. Enhanced Printer Settings: For more precise control, detailed printer settings like color and collation are included directly within the report configuration.
8. XML/XSLT Web Export: Export reports that are ready to be viewed in web browsers with built-in stylesheets for clean, professional presentation.
9. Integrated Preview Controls: Includes ready-to-use controls for previewing and exporting reports within your application, enhancing user experience.
