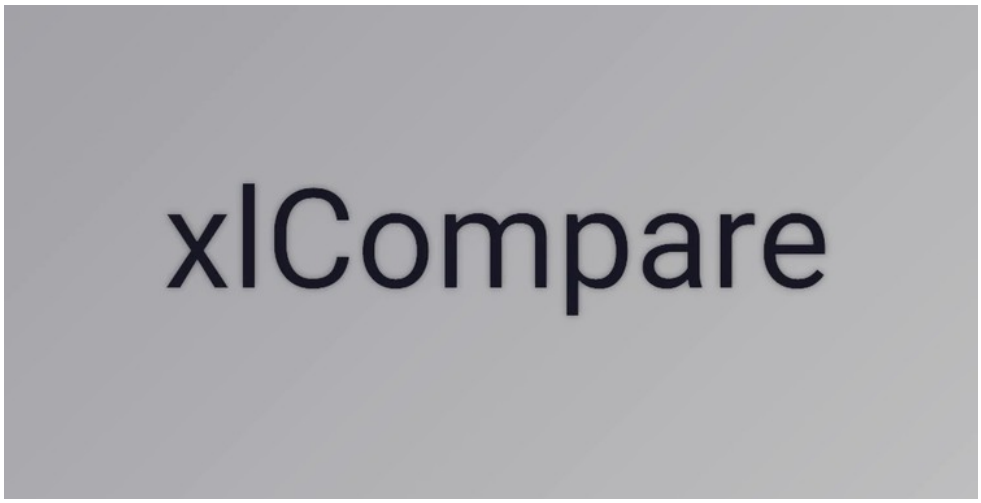
xlCompare v11.01.35 for Win x64

2025-01-02 12:34:48



Combine and compare Excel sheets, VBA formulas, macros, and other forms simultaneously. xlCompare utilizes its advanced algorithms to detect variations between worksheets and display the comparison results in a user-friendly and visual design. Color-coded comparison results appear precisely like the Excel workbook, and this isn't a typical cell-by-cell comparison. xlCompare can identify deleted, added, or changed data and allows you to merge disparate data with just one click. It compares and joins database lists. Command line mode is an ideal tool for managing version control tasks.

xlCompare is a tried and tested xl comparator solution used by thousands of computers across the globe. We are very proud of each one of our clients!

There are numerous helpful features and advantages that the xl comparer gives. You'll efficiently perform all spreadsheet comparisons with them and join routine tasks!

xlCompare examines your worksheets for altered cells and provides an xlCompare report that is colored with highlighted cells that have been changed and rows that have been deleted or inserted.

Maintain your table to current by detecting unique and duplicated data on your worksheet. xlCompare searches for all records that have been that are inserted into the Excel Table.

Examine all formulas on the worksheets for any modifications. xlCompare will direct you to the modified portion in the equation. Do not search for the differences in the text by hand!

Each of the changed cells and columns unique to the worksheet will be identified by color on the worksheet. It is easy to identify them in the worksheet alongside other cells. If this isn't enough, use the to ignore the Formatting option to remove the formatting of your original cells.

Read duplicated records with a single click. Highlight duplicates using different background colors to create the spotlight on these rows. Copy and move rows with duplicates by filtering them in the worksheet. Sort Duplicate Rows, Keys and keys.

The spreadsheet you're comparing the spreadsheet you compare - Price List, Accounting Statement or Financial Model The spreadsheet you compare xlCompare provides the most appropriate algorithm for comparison. This will give more accurate results when compared.

Simple-to-use Merge Commands transfer cell data from one worksheet to another worksheet in native and visual format. You can update cells one at a with bulk merging commands. Update the database table with new records in just a few seconds.

Explore all differences in one unified list. Examine changes and merge the Excel spreadsheets' rows, cells and columns that have been compared using the list. Difference Explorer gives you an exact answer to what has changed within the workbook.

Do not ignore hidden Rows and hidden Columns. Select the data that you want to compare. Display Difference Between Cells. Highlight cells using color when merging. Options for command line. xlCompare offers a variety of options that you can choose from to get the most effective results in comparison.

标签

Applications Tools

- Compare huge files
- Multiple Filtering Options
- Options for a specific worksheet
- Compare Visual Basic Code
- Compare Visual Basic Form
- SVN Integration
- VBA automation
- Color Coded Difference Report
- Export Comparison Report
- Easy To Use Update Commands
- Trending Arrow

What makes your work with xlCompare comfortable

- Completely independent from Excel
- Parallel scrolling in both opened worksheets
- Highlight Differences with Color
- Multiple Filtering Options
- Number of Comparison Algorithms
- Quick access to Recent Comparisons
- Show or Hide Difference Types
- Command Line Options
- Compare Visual Basic Projects
- Create Color Coded Difference Reports
- Create Outlined Reports
- Save Diff Report into PDF format
- Seamless workflow with one interface
- Select data to be compared
- Setting Accuracy Value for the comparison
- Compare Multiple Worksheets at once
- Online User Manual
- Individual Comparison Options for each Worksheet
- Automatic update (merge) for the found differences
- Exclude characters from the comparison

What can be customized in the Excel File Compare

- Color Coding for formatting differences in the Comparison Report
- Interface Layout
- Comparison Templates (algorithms)
- Filters and Options
- Comparison Accuracy
- Ignored characters

Differences detected by Excel File Compare

- Entered Values
- Calculated Values (the result of the formula)
- Formula Text (including array formulas)
- Added and Removed Rows (unique rows)
- Added and Removed Columns (unique columns)
- Added and Removed Worksheets
- Added and Removed VBA Modules
- Added and Removed VBA Forms
- Worksheet Names
- Duplicate Records
- Defined Names
- Excel Tables
- Worksheet Shapes
- External Links
- Visual Basic Code
- Visual Basic Form Controls
- Cell Background Color
- Cell Number Formatting
- Cell Text Alignment
- Font Name
- Font Size (Height)
- Font Color (Text Color)
- Font Styles
- Font Underline
- Font Strike
- Font super and subscripts
- Cell Border
- Cell Border Colors (Interior)

- Cell Protection
- Cell Comments

Which Differences can you merge with Excel File Compare

- Update single Difference
- Bulk update for a group of Differences
- Entered Values (Constant Cells)
- Formula Text (Calculated Values)
- New and Deleted Rows
- New and Deleted Columns
- Redundant Records
- Defined Names
- Cell Background Color
- Cell Number Formatting
- Cell Alignment
- Font Name
- Font Style
- Font Size
- Font Color (Cell Text Color)
- Font Underline
- Font Strike
- Font Subscript and Superscript
- Cell Border
- Cell Border Color
- Cell Comments
- Added and Removed Worksheets
