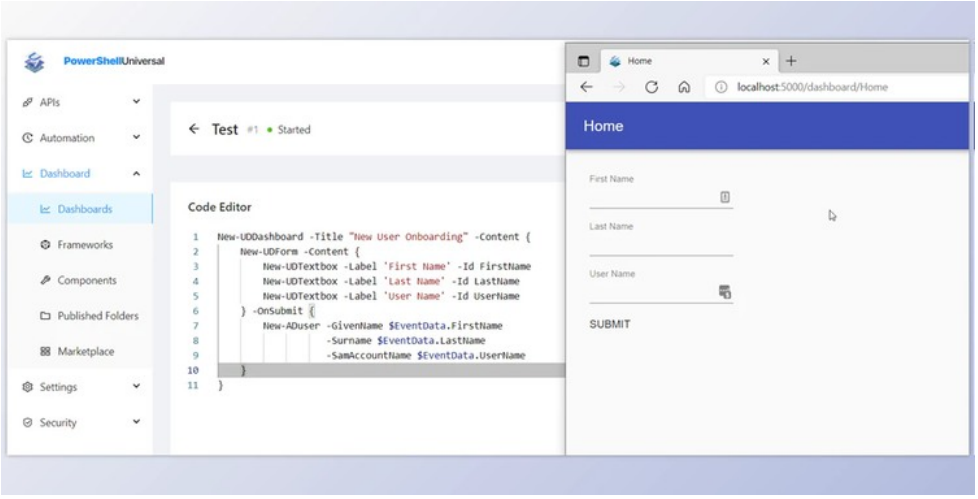
Ironman Software Powershell Universal v3.2.1 (11 Aug 2022) + Desktop Edition

2024-12-29 13:47:26



PowerShell Universal is the best platform to build web-based IT tools. This extension allows you to develop tools with PowerShell Universal.

PowerShell Universal Create custom web-based tools using PowerShell.

Ironman Software Powershell Universal Great Features:

Your PowerShell scripts can be exposed as REST APIs. You can call them from any platform capable of communicating over HTTP. To prevent abuse of the service, secure them with app tokens.

A platform designed for PowerShell scripts can replace the task scheduler. Schedule jobs, use alternate accounts to access the output and data normally hidden away. Allow users to create scripts and let them manage tickets.

Create interactive web interfaces for your scripts. You can build the exact tool you need in your environment with over 40 components and many user-built parts.

Drag and drop design allows you to create tools and invoke PowerShell scripts.
