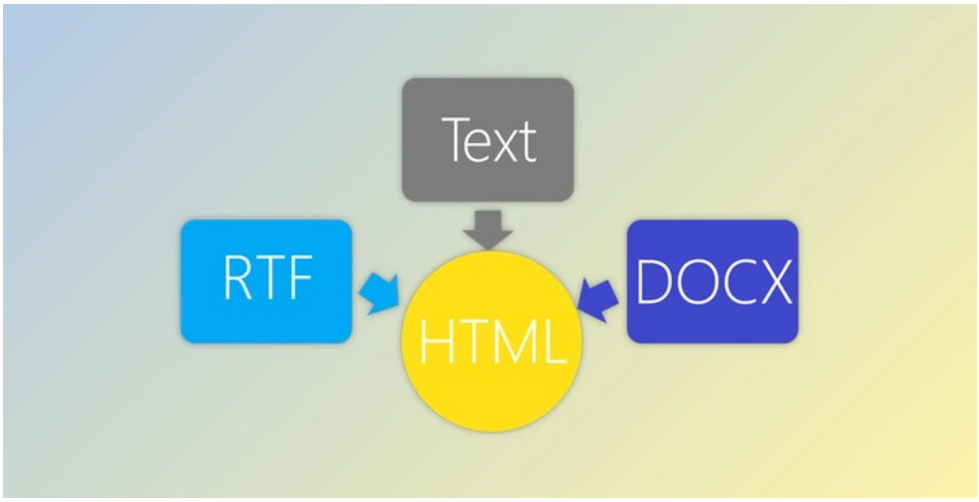
SautinSoft RTF to HTML .Net v8.1.2.2 (02 Feb 2023)

2025-01-01 21:51:47



"RTF into HTML .Net" is 100% written in C# .NET meeting, which offers a wide variety of API for programmers. It provides you ability to incorporate these functions:

- Convert RTF to HTML.
- Convert DOCX into HTML
- Convert Text into HTML.
- Convert RTF to Text.

The SDK is 100 percent C# .NET library using broad abilities to export any RTF (rich text format) and Text file to HTML, XHTML with and without CSS.

RTF into HTML .Net is 100 percent C# meeting to convert RTF, Text and DOCX files to HTML 3.2, HTML 4.01, HTML5 with CSS and XHTML 1.01.
The absolutely standalone alternative does not need MS Office or some other. Requires just .NET Framework 4.0 and up or .NET Core 2.0 and up.

+ HTML Writer: An additional picture cache allows you to duplicate the same images a few times while conserving in HTML.
+ DOCX and Tables inside. The purchase of columns, columns are broken. The problem has been fixed.
+ A problem with the wrong handling of text diameter in the record was fixed.
+ HTML Writer: Improved the algorithm to leave HTML-document in Fixed mode. Now the different symbols' own (x,y) coordinates are mixing into words and single paragraphs. Thus, this invention permitted to lower the magnitude of HTML files into 3 occasions.
+ HTML. Fixed the problem with the erroneous definition of the table width.
+ RTF. "AutoFit" choice for the manually generated table doesn't operate properly. The problem has been fixed.
+ Fixed issues out of our clientele.

The part supports conversion of RTF to HTML together:

- Complete text formatting (font face, color, size, bold, italic, underline, double underline, strike, superscript, subscript).
- Pictures in JPG, PNG, GIF, BMP formats (saved separately or within HTML file using base64 encoding).
- Tables (boundaries, history, nested tables, mixed cells, nested tables).
- Font colors, face, dimensions.
- Hyperlinks and anchors.
- Ordered and unordered lists.
- Tracking varies.
- Complete Unicode support.
- Particular characters.

We provide a lot of thought of analyzing our HTML files at the W3C Markup validation service following every launch of this part.

HTML files changed by"RTF into HTML .Net" are entirely legitimate with W3C rules.
