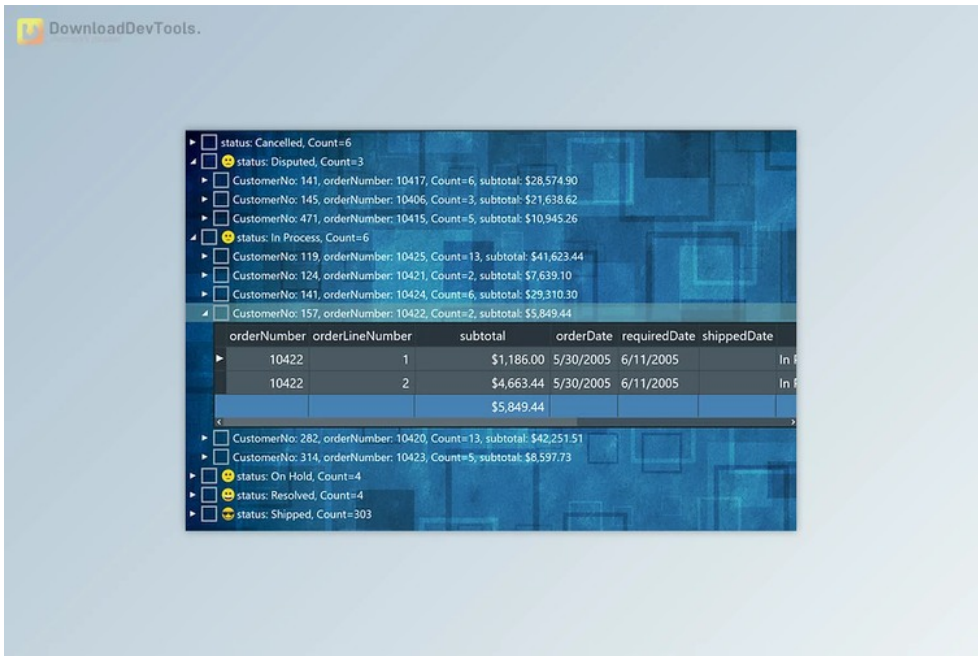
Woll2Woll FirePower X3 v37.0.0.1 (16 Sep 2025) for Delphi 13 Florence Retail

2025-10-02 01:36:46



Woll2Woll FirePower revolutionizes multi-platform app development with its state-of-the-art FireMonkey components for RAD Studio's FMX library. This powerful suite empowers developers to create one cohesive and expressive application that seamlessly runs across various devices, including iPhones, iPads, Android phones and tablets, Linux systems, MacBooks, and Windows computers. By delivering intuitive and high-performance components, FirePower ensures developers can develop efficiently without compromising capabilities or performance.

FirePower is a must-have component suite, leveraging Woll2Woll's extensive expertise to provide versatile grids and controls that excel on desktop and mobile platforms. Its comprehensive feature set includes expressive grids, edit controls, list boxes, combos, searching and filtering mechanisms, validation rules, and mobile extensions. It equips developers with the tools needed to craft professional-quality user interfaces. With **Woll2Woll FirePower**, developers can build applications that are not only intuitive and fast but also enjoyable to develop.

Recent enhancements to further enhance its capabilities, including expandable Master/Detail grids, streamlined image integration into controls, and various new controls such as buttons and trackbars with customizable features. Whether you're building desktop or mobile applications, FirePower streamlines the development process, allowing developers to focus on creating exceptional user experiences across all platforms.

Key Features of **Woll2Woll FirePower** :

1. State-of-the-art FireMonkey components for RAD Studio's FMX library
2. Enables the development of one powerful and expressive app for multiple devices
3. Compatible with iPhones, iPads, Android devices, Linux systems, and MacBooks/Windows computers
4. Intuitive and high-performance components for efficient development
5. Versatile grids, edit controls, list boxes, combos, searching and filtering mechanisms, and validation rules
6. Mobile extensions for enhanced functionality

所有软件资源 100%安全 已检测 无病毒 无篡改
