Through this class, you'll realize that outsourcing the majority of your work to AI tools will not just help you save time and effort but will completely alter your view of the process of making cartoon films since the amount of work needed to be completed can be drastically reduced without sacrificing its quality—Finished film. In the first class, you'll learn how AI tools can assist in creating cartoon films and how to mix them all to produce the most effective result. After that, you will learn how to write efficient ChatGPT prompts that can be used for creating film content concepts and outlines. When you've decided which outline and idea you'd like to incorporate into your animated film, you'll learn how to start your first animation film from scratch. We will use ChatGPT to write cartoon characters, narration, or dialogue between characters. Then, AI tools such as Big Speak A convert the text into incredibly realistic human voices.

After you have the narration and characters' voices, the second step you'll be taught is how to use text-to-image generators such as Leonardo AI and Runway ML to generate the characters and scenes you'd like. Naturally, when creating characters, it is necessary to create the same face for various scenes and expressions. Therefore, you'll also learn precisely how to compose the instructions for creating identical faces for different scenes. After all the characters have been designed and you've learned how to utilize Meta Demo Lab to animate the characters, allowing you to transform your ideas into awesome animation. After you've created the voice and animated scenes of characters, you'll be able to learn step-by-step how to put them together with Veed I, one of the most powerful browser-based editing programs.

Alongside creating films, You will also be able to gain other essential skills you should possess as a cartoon director. In the next class, you will be taught how to create captivating film thumbnails to entice the curiosity of potential viewers, and you will discover how to grow and build your social media following through platforms such as Tiktok and YouTube and also discover different methods to market your cartoon content and possibly create your own cartoon business once you begin earning revenue from various sources.

### Here are the things you'll learn in this course:

- How to generate titles, ideas for cartoon film outlines, and content scripts by using ChatGPT
- Understanding how to utilize Leonardo AI Text and Runway ML to create cartoon characters and scenes
- Learning to utilize Big Speak AI and Eleven Labs to convert scripts of content into a natural human voice
- Understanding how to make use of Meta Demo Lab and Adobe Express to draw cartoon characters

- 4. Generating Film Ideas & Outlines Using ChatGPT
- 5. Project 1 Creating Cartoon Animation Film 1
- 6. Project 2 Creating Cartoon Animation Film 2
- 7. Designing Interesting Thumbnail
- 8. Comparison Tiktok vs Youtube
- 9. Monetising Cartoon Animation Film
- 10. Building & Growing Audience
- 11. Conclusion & Summary

What is Creating Cartoon Animation Film with AI?

Creating a cartoon animation film with AI involves using artificial intelligence (AI) technologies and tools at various stages of the animation production process. AI can be applied to streamline tasks, enhance creativity, and optimize efficiency.

It's important to note that while AI can be a powerful tool in the animation process, human creativity, storytelling, and artistic direction remain integral to the success of the film. Filmmakers often use AI as a complement to their skills, leveraging its capabilities to enhance efficiency and push creative boundaries in animation. Additionally, ethical considerations, such as responsible AI use and proper attribution, should be taken into account throughout the production process.
