Kellerman Software .NET Data Access Layer v5.18 (03 Mar 2022) Retail

2024-12-18 23:04:00

Knight Data Access Layer is described to be the Swiss army knife of the object relational mapping as well as the data access along with the LINQ. It is a key differentiator which has the ability to automatically map from classes to tables without having any files of mapping, attributes as well as visual models or even the convention definition. The ultimate pair in this case has the ability to map SQL as well as stored procedure results to classes without having any mapping definition. When the properties as well as the database columns are named differently the mapping process can be defined with the use of the attributes, code or even mapping file of XML. The auto increment primary keys as well as the GUID primary key along with the composite key are supported and my pink can be done in order to be overridden during the runtime. Knight Data Access Layer is the scapula very compatible with the server of SQL, Oracle as well as MySQL, Microsoft Access and even other complaint databases. The custom database in this case has the ability to be easily to be implemented Florida user and developer. The LINQ in this case is considered to be fully supported for any operation including the aggregate, Union, skip is finally taken. Knight Data Access Layer as the ability to support the LINQ to Oracle, to SQL Server, to MySQL, to Firebird, and finally to Microsoft Access. Knight Data Access Layer is considered to be very environment-friendly and the cover patterns are being built as such as the unit of work pattern, active record pattern, session Factory and finally repository pattern. It has the ability to support all the projects of .NET as well as other projects including the win form, Web form, WPF, WCF, and a few more and it has the ability to be used with the languages of the C# as well as VB.NET for the user and the developer. It should be added that it can be purchased separately and the product is also included or the user in the gold suite. The subscribers of the gold suite are capable of receiving all the product updates as well as all the new product as a part of the annual subscription and it is considered to be the best value in the entire industry.

Kellerman Software .NET Data Access Layer Great Features:

- It has the ability to save a lot of time for the user.
- It saves energy as well as money of the user.
- It has the ability to provide high performance.
- It has the ability to work in the user environment perfectly.
- It is considered to be having a royalty-free distribution for the user.
- Provides a lifetime support with email technical support to the user and developer.
- The user has the ability to purchase today and get all the upgrades for free to the next year.
