PilotEdit v20.9.0 for Win x86 & x64 Multilingual

2026-06-08 09:23:56

PilotEdit is a feature-rich file editor known for its exceptional capabilities in handling large files. With the ability to sort files exceeding 1GB, automate string replacements through **PilotEdit** Scripts, and find/remove duplicate lines in substantial datasets, it streamlines tasks involving extensive data management. The software supports an unlimited file size, allowing for editing, sorting, comparing, merging, and encryption/decryption of files, making it versatile for various file-related operations.

Noteworthy features include robust support for Unicode files, automatic text encoding detection, and customizable file types with keyword highlighting. The editor excels in providing a seamless editing experience, allowing users to define their file types, work in HEX mode, and perform operations in column mode. Additionally, **PilotEdit** offers encryption with 256-bit AES for secure handling of sensitive data and the ability to edit encrypted files transparently, even those exceeding 4GB.

's file comparison and merging capabilities set it apart, enabling users to compare directories, merge large files, and edit files directly within the comparison window. The software supports real-time updates and find/replace functionalities and offers advanced search features. Whether it's FTP or SFTP, **PilotEdit** provides efficient file manipulation, including the editing, deletion, and upload/download of multiple directories and files. Overall, **PilotEdit** stands as a comprehensive solution for users dealing with complex file editing tasks, emphasizing efficiency, security, and versatility.

Key Features of **PilotEdit**:

1. Edit, sort, compare, merge, encrypt, and decrypt unlimited file sizes.
2. With automatic text encoding detection, full support for UNICODE and DOS/UNIX files.
3. Self-defined file types and keyword highlighting for over 30 file types.
4. HEX mode for hexadecimal editing, with endless undo/redo capabilities.
5. Column mode for efficient operations on selected lines.
6. FTP and SFTP file editing, including deleting, uploading, and downloading multiple directories and files.
7. File comparison and merging for directories and files larger than 100GB, with real-time updates.

Tools Applications

8. Self-defined string tables for quick addition of pre-defined strings.
9. Regular expression support with a generator for find/replace operations.
10. Script file execution for frequently used regular expressions, like removing duplicate lines.
11. 256-bit AES encryption for transparent editing of encrypted files.
12. File group functionality for opening multiple files with one click.
13. Find/replace in multiple directories, including search in zip files.
14. Sorting lines in files larger than 1GB based on text, integer number, or regular expression.
15. Extracting target strings from files using regular expressions.
16. Text formatting, including automatic detection of start and end tags.
17. Saving selected files with the old directory structure.
