Oxygen Builder v3.6.1

2026-08-29 15:10:45

Utilize Oxygen's unparalleled power, versatility, and light-weight code to easily design your own WordPress or WooCommerce website.

Oxygen builder is an oasis for programmers sick of easy page builders designed to accommodate novices. It's a steep learning curve, but also the flexibility, customizability, and profound features allow it to be a superb selection for coders. Add leading pricing to the mix, and you get one of those ideal page builders on the market.

Oxygen Builder is a really unique breed of WordPress plugin. It is a tool with compelling functionalities, miles ahead compared to what Elementor or Divi can perform. Nevertheless, the steep learning curve comes alongside the additional functionalities.

It does not work with modules, blocks, or designs. It functions together with divs, columns, and other"code-speak" components.

Therefore it was a fascinating instrument to reassess. If you are considering using it, be sure to read our Oxygen Builder inspection ahead.

Oxygen Builder is a tool that allows you to build complete sites. It's not a page builder or a motif but a hybrid product that allows you to control what you produce.

Oxygen Builder Great Attributes:

Drag element borders to place spacing, or drag & drop to re-order.

Get visual management of each component of your WooCommerce shop.

Produce custom site headers visually, such as tacky and overlay headers.

Edit colors in 1 area. Changes take effect anywhere the color was used.

Construct with basic HTML components. Compose PHP, CSS, and JS reside.

Flexible builder components. Dynamic information with repeaters and loops.
