Progress WS_FTP Professional (Secure FTP Client Software) v12.8.7

2025-01-01 21:38:37

WS_FTP Professional is the most secure and efficient method to transfer and upload files safely. Enjoy SFTP transfers that feature the highest levels of security and ease of use with the customization and lower administration costs.

WS_FTP Professional supports SSH, SSL as well as HTTPS

Secure files before, during, and after transfer using the 256-bit AES, FIPS 140-2-validated cryptography, and OpenPGP encryption of files. Utilize SFTP for authentication and connect with servers that require SSH client clients, which respond to prompts from servers to authenticate and the username.

A user-friendly display, drag-and-drop functions, and many other features that save time help make our FTP client extremely easy to use.

It is easy to locate and transfer files by using the integrated Google(TM), Copernic(TM), or Windows(r) desktop search engines. Search using parameters like the file's type, size, and date. Make use of the SFTP client to connect instantly to several servers. Drag and servers a great way to move any size and kind of file between your computer and a distant server and from one to the next.

Plan post-transfer actions, for example, the deletion, relocation, or changing of the file name.

Protect yoServert essential files and folders, make recurring transfers scheduled and synch with virtually any device, location such as a drive, server, or. Utilize built-in features like email notifications, backup compression, synchronization, and post-transfer event the ability to schedule.

Enhance your capability to transfer files Server increased commercial, SLA Security, business, legal compliance requirements.

Gain more control over crucial business processes using Our secure and secure WS_FTP Server. You can ensure SLA and compliance with regulations by using tamper-proof audit trails and evidence of delivery to the recipient you want (non-repudiation) when you upgrade to the MOVEit Transfer Server or our MOVEit Cloud PCI, as well as HIPAA certified File transfer software.

Progress WS_FTP Professional (Secure FTP Client Software) Great Features:

File Transfer Protocols

- FTP
- SSL/FTPS
- SSH/SFTP
- HTTP/S
- OpenSSL

Security

- 256-bit AES Transport Encryption
- CRC32, MD5, SHA1, SHA256, SHA512
- PGP File Encryption
- FIPS 140-2 Validated Cryptography
- AES [128/192/256]-CTR Cipher Support
- Supports Windows 10 Security Features

Connections & Transfers

所有软件资源 100%安全 已检测 无病毒 无篡改
