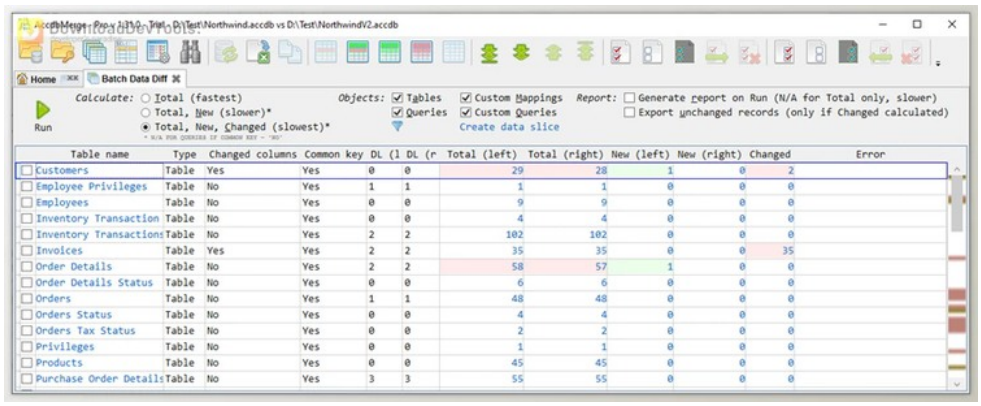
KS DB Merge Tools for MS Access (AccdbMerge) v1.35.3

2025-09-28 11:03:28



is a strong yet minimal solution that enables users to compare and merge Microsoft Access database files. This tool simplifies the database comparison and version merging process as well as change tracking and update combination. The tool functions with all Access versions from 2007 to 2024 Microsoft 365 and compatibility for .accdb, .mdb, .mde and .accde file types.

Users can easily perform schema and programming object and data comparisons through the user-friendly display of KS DB Merge Tools. The tool enables users to activate filters that display new modifications or entire items through instant real-time display. Data comparisons involving complex operations become simple through this tool, and merging directions of change is possible. Both versions of KS DB Merge Tools provide essential functionality with no advertising, and they contain a 14-day unlimited trial for the Standard version.

This tool addresses professional and business users through its capacity to compare data batches in addition to providing custom queries and robust merge functionalities. The platform enables effective teamwork through its ability to help track database changes efficiently. **KS DB Merge Tools for MS Access** provides an easy way to handle Microsoft Access databases, making your work faster and minimising mistakes.

Key Features of **KS DB Merge Tools for MS Access** :

1. **Compare & Merge Database Files** – Easily track differences in tables, queries, forms, reports, macros, modules, and more.
2. **Schema & Programming Object Comparison** – Compare table structures, relationships, import/export settings, and database properties.
3. **Data Comparison & Merging** – Check differences per table or query and merge data only when the target is updateable.
4. **Batch Data Diff & Custom Mappings** – Run large-scale comparisons across multiple tables and queries for efficient database management.
5. **Quick Filters & Intuitive UI** – Instantly find new, modified, or unchanged items with an easy-to-use interface.
6. Lightweight & Fast – Under 10MB, ensuring a smooth and efficient experience without slowing down your system.
