Web Contact Scraper v5.9.2.0 Pre-Activated

2025-02-21 21:06:47

Web Contact Scraper can be used to gather targeted business contact information.

Search and find thousands of details for businesses that match your chosen profession anywhere in the world! You can create your own targeted Email Marketing lists! Instantly retrieve 1000 plumbers from New York or 10,000 dance instructors in Australia. The possibilities are endless. Start your targeted business campaign by exporting emails, phone numbers, and addresses to CSV.

Although many business directories can store contact information and can be used to help companies find relevant information, it isn't easy to search for the right data and export it locally.

Web Contact Scraper allows you to find business contact information in the Yellow Pages, White Pages, and Thomson Local directories.

You can search for contacts by specifying which region you should consider. There are many countries in the world that you can choose from.

Multiple search terms can be used to find information on a variety of businesses. The application can also work with multiple locations in a given region.

You can pause jobs and then resume them at a later time. The program also supports proxy servers which allow you to search anonymously for data.

Web Contact Scraper's tabbed interface makes it easy to use, but the color scheme makes it difficult to see the search results.

While it would be nice to have more color options, most people shouldn't find this a problem.

After a search has been performed, the program can remove duplicate addresses and business names, emails, and phone numbers.

You can export the data to a standard CSV format, which many other applications can use.

Web Contact Scraper, a simple tool, can prove to be a valuable resource for companies who need to extract contact information from online databases such as Yelp, White Pages, and Yellow Pages.

Web Contact Scraper lets you retrieve thousands of business contact information in real-time. This information can be used to create your own business campaign. Are you a brand new business owner? Do you want to promote your services or yourself to similar businesses? Web Contact Scraper is the tool for you.

Web Contact Scraper lets you set multiple keywords and locations for your business within one search. You can search for Construction, Plumbing, Electricians, and Building in all 50 States. Although this search can take some time, you can still leave the application open and see the results in real-time. You don't have to wait for lengthy queries to be answered!

You can export large searches in real-time to a CSV file. You can choose to split CSV files by search term, search area, or both!

Both YellowPages or Yelp search can be run simultaneously. Web Contact Scraper can be multi-threaded, and there is no application freezing or hanging.

You can export your results to CSV at any time.

Applications Tools

You can pause and then resume searches with ease. This is particularly useful when you are performing a large search operation. The software allows you to recall up to 10 partial searches.

Searches in progress are not affected by any internet outage or drop-in service. This is because the software detects this and will automatically continue searching once the internet connection is restored.

Web Contact Scraper offers intelligent proxy support that anonymizes your business databases. It can be used to input a list of proxy servers and ignore any that are slow or ineffective. It will only focus on delivering results quickly using the proxies that work and are reliable.

Web Contact Scraper Great Features:

- Search for multiple business keywords (I.e., Construction, Dentist, Lawyer)
- Search within multiple cities, states, and countries!
