Microncode CSScreenRecorder v1.0.5.0 (15 May 2020)

2026-09-10 11:01:27

TheCSScreen Recorder is basically a library of the. NET which has the ability to permit the user and the developer in order to capture the entire activity of the screen into the standard or compressed AVI file of video with the VB.NET as well as the C#. This Library as a built-in tool for the process of spinning which permits the user on the developer to select a particular section that can be left, right, top, width as well as the height of the screen in order to record and also permits the user to get the active window position along with the size. In this case, the user can codecs the video along with the audio codecs of the file of the video to set the quality as well as the mouse tracks and a lot more in an easy and flexible manner with the help of the source code only.

It has the following benefits that are offered to the users and the developers:

- It has the ability to track the activities of the mouse.
- The process of recording, stopping, resuming as well as pausing can be done by the user.
- It can set the height as well as the width to capture.
- Setting the left as well as the top position for the user to capture.
- Setting the rate of the frame at the same time building a tool for the process of spinning.
- It provides the user with the ability to mute the sound.
- It provides the user and the developers very high-quality results.
- Provides the user the chance to preview the results.
- It has the ability to add Watermark to the file of the video.
- It has relevant events.
- It reduces the developing process of the user and the developer as well as saves energy.
- The user can use it in a free or a commercial product.
