Passper for PowerPoint v4.0.3.1 Multilingual

2025-05-06 17:13:35

simplifies unlocking encrypted PowerPoint files with its efficient GPU-accelerated password recovery, boasting speeds up to 10 times faster. Beyond swift password retrieval, it effortlessly removes restrictions from read-only files, enabling editing, copying, and printing without hassle. Featuring four flexible recovery methods Combination Attack and Dictionary Attack, **Passper for PowerPoint** ensures a tailored approach to password retrieval, enhancing the chances of success. Its GPU acceleration technology optimizes the recovery process for speed, while the ability to save recovery states allows for seamless continuation at any time.

Additionally, **Passper for PowerPoint** streamlines the process with one-click removal of restrictions, providing a straightforward solution to unlocking PowerPoint passwords and accessing crucial content with ease.

Key Features of **Passper for PowerPoint**:

1. GPU-accelerated password recovery up to 10 times faster
2. Effortless removal of restrictions from read-only files
3. Four flexible recovery methods: Combination Attack, Dictionary Attack, Combination Attack, Mask Attack, and Brute-Force Attack
4. Optimized recovery process with GPU acceleration technology
5. Ability to save recovery states for seamless continuation
6. One-click removal of restrictions for easy copying, printing, and editing
