SQLTreeo v0.8.120190206 Pre-Activated

2025-01-29 13:26:04

As a business owner, you're faced with a lot to consider. Instead of conceiving and setting up your monitoring protocols for your database and procedures, why not contact SQLTreeo? Our complete monitoring tool will give you security and peace of mind. It also means you can concentrate on what you enjoy doing best: managing and expanding your business.

Do you have a slow database that is insecure? Do you have an expert on call in case there is a problem? Perhaps your business has been so successful that you need an additional capability for managing data?

These are just a few areas where SQLTreeo's SQLTreeo team can be of assistance.

Our experts are highly skilled and have extensive knowledge of databases and experience. We hire the top and invest continuously in their continuous development, training, and skills.

Since 1998, we've collaborated with healthcare and government department providers to energy and financial services firms. All of they have admired us:

- Knowledge of databases in technical terms
- Practical problem solving
- Rapid, reliable, flexible customer service.

A web-based database monitoring platform accessible from any internet device that gives you quick view of the SQL Servers. It includes alerts, charts-in-charts Interactive dashboards. Set up the monitoring software wherever within your system (Not directly on your SQL server itself). It will then feed the monitored platform hosted by Microsoft with statuses and metrics over HTTPS. The company's data is not transferred, just technical metrics. It is not necessary to install a separate application. The automatic upgrades are performed through the platform.
