DBi Tech Calendar for WPF v2.0.0.5

2026-08-31 13:51:48

Straight forward and to the point - direct edit appointment scheduling with multiple calendars and reporting views.

- Month View
- Multi Column Day / Resource View
- Week View

DBI Calendar WPF is the number one choice of developers for managing:

- Appointments
- Contacts
- Locations
- Tasks

Across the enterprise and worldwide, provide your end users with direct inline editing, built-in context menus, multi-object grouping, sorting, and complete data integration.

Time zone management is made simple.

DBI Calendar WPF combines three control views;

- Multi Column Day / Resource View
- Month Calendar View
- Week Calendar View

into one compact, feature-rich, royalty-free WPF component software product - for expertly adding schedule functionality in any WPF application.

Data Integration - DBI Calendar WPF is designed for data flexibility. Connect to any data source - XML to SQL, Oracle, DB2 ...

DBI Calendar WPF Expertly Manages:

one-to-many and many-to-many relationships

It's not uncommon for one appointment, a conference call, to appear in many locations and have many contacts and tasks associated with that activity.

Variable Time Scale - Life doesn't happen in even, 15, 30, or 60-minute intervals; life happens around the clock in any combination and permutation of time.

Onsite service personnel is scheduled when needed, Golf Course Tee Times are scheduled at 7-minute intervals, and components of a dentist appointment may range from 3 minutes to 75 minutes.

With Calendar, WPF current schedules in time scale increments of 1 minute to 60 minutes or any combination.

DBi Tech Calendar for WPF Great Features:

- Three Schedule Views
- Multiple Report Views
- Full MVVM Support
- Direct Edit

所有软件资源 100%安全 已检测 无病毒 无篡改
