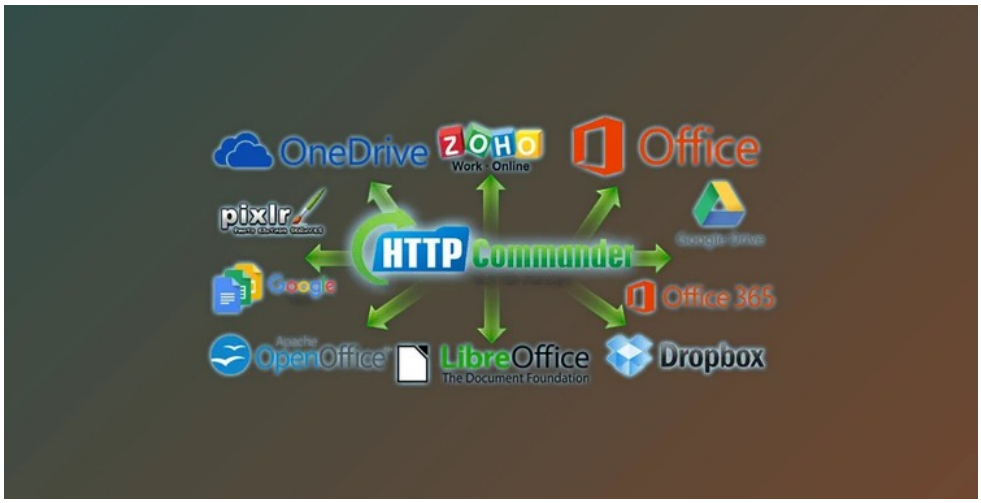
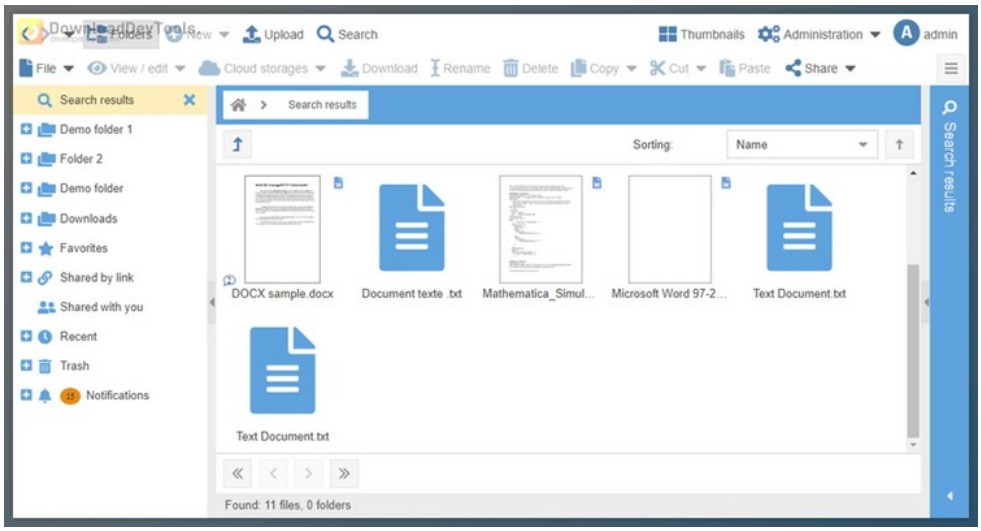
Element-IT HTTP Commander AJS v8.0.3 (13 Nov 2025)

2025-12-02 14:05:06





Element-IT HTTP Commander AJS is a versatile web-based file management solution designed for seamless integration with Windows servers, offering users a familiar and user-friendly interface reminiscent of Windows Explorer. With support for various browsers and operating systems, users can efficiently access, share, and manage files remotely from any location using only a web browser. This eliminates the need for traditional file transfer methods like FTP or Sharepoint. The software's extensive feature set includes online document editing, desktop office integration, real-time collaboration, media playback, and flexible file-sharing options, making it a comprehensive solution for organizations of all sizes.

One of 's standout features is its robust integration capabilities, allowing seamless connectivity with popular cloud storage services such as Dropbox, Google Drive, and Microsoft OneDrive. Additionally, WebDAV protocol support enables easy web folder mapping and compatibility with desktop applications, enhancing workflow efficiency. The software also provides mobile compatibility, ensuring accessibility across a range of devices and multilingual support for users worldwide, with translations available in over 40 languages.

Element-IT HTTP Commander AJS boasts an intuitive admin panel for easy configuration and management, empowering administrators to customize settings, manage user permissions, monitor activities, and more. It also supports integration with Microsoft Azure Active Directory for seamless user authentication and permissions management, making it an ideal solution for organizations utilizing Azure AD. With features like recent document tracking, modifications monitoring, trash bin functionality, and advanced search capabilities, HTTP Commander offers a comprehensive and efficient file management solution tailored to the needs of modern organizations.

Key Features of **Element-IT HTTP Commander AJS** :

1. Familiar Windows Explorer-like interface for intuitive file management
2. Online document viewing and editing directly within the browser
3. Integration with leading online editing services like Google Docs and Office 365
4. Direct opening and editing of remote documents in desktop Microsoft Office or OpenOffice/LibreOffice
5. Real-time collaborative editing of office documents with multiple users
6. Online streaming of video and audio files without downloading
7. Flexible file and folder-sharing options, including internal and public links
