Stock Manager Advance with POS Module v3.4.48 Nulled

2025-01-01 22:17:07

Stock Manager Advance with POS module (Point of Sale) is a PHP/jQuery-based web application that allows managing sales and inventory online.

You can update your stock information, view sales data, and make purchases anywhere, whether at work, home, or in the warehouse. Access to this information is as simple as a computer with an internet connection.

Stock Manager Advance includes an integrated Invoice and Inventory System. The invoice System offers Taxes and Discounts. These are very useful to apply taxes and discounts automatically and to generate invoices from quotations.

The responsive theme with 3 styles. Calendar to add events, daily/month sales, and tax amounts. Advance and improved reports for the overview, stock value per warehouse, custom sales, and purchase reports.

Stock Manager Advance allows you to manage multiple warehouses.
The POS Module was redesigned for improved performance, user interface, and usability.

Stock Manager Advance with POS Module Great Features:

With Overview & Best Seller Chart, Latest Five (sales, quotations. purchases, transfers, customers & suppliers)

Standard, Combo & Digital products with import option along with quantity adjustment and bulk update feature.

Simple and easy to use design with registers, virtual keyboard, hold/suspend sales and display customer screen option. Quick Cash buttons and Accept payment with PayPal Pro, Stripe and Authrise.net

Sales with payments and the option to accept payments online by PayPal and Skrill, along with delivery, gift cards, and returns options.

Add quotation, convert them to sales or purchase order with the download as pdf option.
