Reportizer v6.6.2.368 Multilingual

2026-05-10 19:42:56

is a comprehensive report generation tool that simplifies the creation of professional reports from both databases and files. Its intuitive Visual Report Designer enables users to swiftly design reports through a user-friendly interface equipped with drag-and-drop functionality and a rich set of tools. For advanced users, there's an option to tweak reports in text mode, ensuring flexibility in customization.

The tool's Convenient SQL Editor facilitates the easy creation of database reports with its syntax highlighting, code completion, and support for dynamic SQL features. Users can dynamically harness the power of SQL queries, parameters, and macros to manipulate data at runtime, enhancing report functionality. The powerful Report Generator engine also supports various features such as dynamically calculated expressions, image display, and multi-column reports, ensuring versatile and informative report outputs.

Reportizer offers compatibility with various database formats and file types, ensuring seamless integration with diverse data sources. Users can effortlessly adapt report designs across different database types, maintaining consistency in visual presentation. With features like file report generation and flexible export options to formats like HTML and Excel, **Reportizer** provides a robust solution for efficiently generating, sharing, and viewing reports.

Key Features of **Reportizer**:

1. Visual Report Designer with drag-and-drop interface
2. Convenient SQL Editor with syntax highlighting and code completion
3. Support for dynamic SQL features, query parameters, and macros
4. Powerful Report Generator engine supporting dynamically calculated expressions and image display
