

Beat Batter Drums From The Basement (WAV)

2025-02-10 16:46:47 label 我要反馈 下载页面

Beat Batter Drums From The Basement (WAV): Drums From the Basement is a collection of 267 unique drum shots as well as breaks and loops. The raw and gritty texture of the underground was our goal when we designed this collection. Two rooms and a corridor from an old basement were used to make an acoustic and environmental space to record.

The design and layout of every room played an important role in the capture of natural resonance and tones. Background ambience as well as other sounds like ceiling drips, are incorporated into recordings, adding unique details. Analog saturation on tape was instrumental in providing warmth and color to each of the samples. We hope you like the kit! - Beat Batter

How to use Rimshots for music production?

You can have a music production using "Beat Batter Drums From The Basement (WAV)" in Sound Effects.

Where can I download the product?

After subscription, You can download it for free from here.

SOUND EFFECTS

Beat Batter Drums From The Basement is a meticulously crafted collection of raw and gritty drum sounds with an underground vibe. The use of an abandoned basement as the recording space adds a unique character to the samples, and the inclusion of ambient sounds from the environment is a nice touch.

It's great to see that the kit includes a variety of one-shot drum sounds, loops, and percussion elements, making it versatile for different styles of music production. The fact that the samples are royalty-free and provided in high-quality WAV format makes them easy to integrate into various DAWs.
