Morgan Burks Film Grain Texture Collection:

This set of textures was made to give your images a moody, gritty film-like appearance. They look stunning when layered over black and white photos.

Use them in "Overlay" or "Hard Blend Modes" to add more grit and depth, or use 'Screen' and 'Color Dodge' mix modes to create the look of weathered.

The set includes five main textures as well as 5 inverted textures, for the completion of 10. The inverted textures are fantastic for creating the look of a distressed or aged when you want to create imagery that is reminiscent of the nostalgic look of old photos.

Compatible with all programs that support layers. (CS, CC, PSE, etc.)
