Entrian Source Search v1.8.4 (03 Jul 2023)

2024-12-18 23:02:00

Entrian Source Search is described to be a search engine for the source of the code which is present for the users and developers. It has the capability to assemble the full text indicator of the user document and also the ability to hunt it immediately, and also to provide a syntax colored outcomes. It has the capability to suggest everything and not only code but also the fuzzy as well as lose hunting intense for the user and developers. It is considered to be a full text search engine to the user source code in order to find each and every occurrence of a word as well as a phrase, function as well as a variable, API, error of the code, and anything else on the user source code with the use of a keystroke. It has the ability to search all the user document but note the remarks, strings as well as the tools, the documentation, notes and everything. It has the ability to supply the search which goes beyond era factoring tool in order to find all the information and locate the important information in areas on the user solution. It has a very first performance which can entertain the assemblers of the source search as well as a full text indicator for the user file which is unbelievably fast.

Syntax highlighter the search results is present for the users and developers and it is not an eye candy. Whenever the user searches the results, he has the ability to use the same color scheme as the source code in the user editor. It is considered to be easier for the user in order to scan them. The glancing process between the search result as well as the editor is less of context which has the ability to switch off the user brain.

Autocomplete for each and every word in the user code. This does not auto complete the save typing process and it has the ability to offer an answer to questions of the user before the user has even asked it.

Seamless integration along with the visual studio is provided to the user. The Source search integrate into the user Visual Studio easily and seamlessly and it has the ability to pick the reference of the user and fitted with the way that the user desires to work with it.

Entrian Source Search Great Features:

It has the following features and attributes that are stated as below such as:

- The searching process for the words such as words, code>snippets, as well as the wild car is possible.
- Searching for the word such as those that are near to each other with the use of the Loose phrase search is possible.
- It filters on the edge of the file just like picking up only files that have been modified within the past 2 hours.
- It has the ability to limit the user search the files along with certain extensions.
