Andrew Optics – Lightroom Preset Pack – Vol. 2: I designed this collection of Lightroom presets to guide you and provide you with several different points of departure to your images. They work well on any image but are particularly effective on urban landscapes, landscapes, and lifestyle photos. These are the presets I've used on my images to create a unique style I've created over five years.

The pack includes 21 different presets:

- **The AO Lifestyle** is ideal for improving any lifestyle photos, particularly those shot in the golden hour. It's also excellent for drone images and portraits.
- **City Streets v2** Back due to popular demand, a new update to my original "City Streets" preset. It's best used with urban photography, giving your photos that distinctive AndrewOpticsorange glow.
- **Color POP** is excellent for any image to make them truly pop!
- **Moody Night** is Ideal for photography with low light, such as evening scenes or trails of light.
- **The Greens** The Greens are Ideal for landscapes with grass, trees, or other sources in the form of "green." It cools the scene while creating a pleasant mood.
- **Light Enhance:** The bonus settings create realistic-looking lighting from the left or right side or at the top of the picture. They're designed to improve and manage the light already present in the image and can be combined with other presets since they will not affect the overall settings. They are great for waterfalls, tree tunnels, and any image that can direct lighting.
