My colors are subtle, neutral, and organic colors which will Stand the test of time. They are not cool, they won't move out of fashion by the following season. I desired classic colors, that in a couple of years when you look Back in the photographs edited with all these presets you do not cringe at how obsolete They seem. These presets are hot with amber, gold, and brown being the underlying tones. This package works very nicely on any Kind of camera, in Different lighting scenarios - from gentle light to guide, in addition to inside Shots. I suggest adjusting the white balance in the camera and nailing the Vulnerability so the presets could be one-click.

#### WHAT'S INCLUDED

- 24 PRESETS + TOOLKIT
- The PBX collection from Pablo Beglez includes a total of 24 presets With 6 colours and two BW presets in 16 distinct variations. Also, it includes an Additional toolset to restrain grain, contrast, and much more.
