2026-10-04 21:24:24

Studio Controls for COM provides developers with a complete range of 89 royalty-free UX control for Scheduling and design for all 32-bit IDEs that are OLE compliant. A great experience for developers with all the Scheduling and Data Visualisation Dialogue and Calendar software components, which include a calendar year of support for technical issues, component updates, product updates, and online management of licenses.

Studio Controls COM offers an exceptional developer experience that includes 32 and 64-bit Unicode Scheduling and Data Visualisation and Dialogues, Reporting and Calendars, and navigation software components. It includes one year of tech support and component upgrades and updates.

DBi Tech Studio Controls for COM Great Features:

Calendar * Multi-Day View * Week View

New Studio Controls COM 64 The ctxCalendar control combines the best of three scheduling worlds into a single 32/64-bit ActiveX control.

- Multi Column Day View
- Monthly Calendar
- Week View

Once you have loaded the data, you can display the appointment, contact, location, and Task information in one, two, or three perspectives.

Contact Management, Rolodex...

Create customized Rolodexes as well as contact management systems using the ctxContact. It is perfect for improving Corporate as well as Personal Information Management solutions.

A fantastic set of features that allow developers to customize their experience fully.

See What's New

List, Tree, and Grid The heart of any solid application lies in the power, performance, and functionality of interfacing with data. Then, effectively presenting the information.

Proven in the market, DBI's 32 and 64-bit ActiveX data management control performs better and produces results beyond expectations.

DBI's unique presentation of data and reporting tools provide developers with various Unicode-compatible options for quick built-in reporting, quick data entry, lightning-fast data entry, and accessible data presentation.

Visualization of Data: Gauge and Meter controls give you a certain level of precision in presenting data to comprehend what data is quickly is saying and simultaneously make complex data accessible.

Data Edit / Input Presentation Data input and the ability to edit data is the core of application development, along with reports - check out ctxList. Enhance presentation, real estate, and function using DBI's edit control.

General Dialogue and Presentation Add flexibility to your favorite IDE using the unique presentation tools of Studio Controls 64. Fourteen control options for presentation and Four Dialogue controls will add clearly defined brand identity, User Interface design, and improved functionality, saving you countless minutes of programming.

Navigation: Increase navigation options to meet Windows interface standards quickly and easily with Studio Controls COM64

所有软件资源 100%安全 已检测 无病毒 无篡改
