Adobe Acrobat Pro is equipped with unique tools that help enhance productivity and processes involving PDF documents. Enables users to create, edit, protect, collaborate, and even sign documents using one of the advanced 70 functions provided by Adobe. It has many functionalities, such as OCR, allow users to convert scanned documents into searchable ones. Further, it supports information redaction, password protection of documents, simple tracking, e-signature requests, export of PDF documents to multiple MS Office formats for easier workflow, etc. It also has an AI Assistant to help manage documents by providing users with quick answers and summaries of documents.
