ScreenHunter Pro v7.0.1427

2025-01-01 22:10:11

Planning to make your tutorial using feature-rich capture software can save you boergy and time. This comprehensive tool ScreenHunter Pro. ScreenHunter Pro.

When you launch the application, a small window will be displayed, which makes it possible to begin taking a picture or video with one mouse click.

It is also possible to record your webcam's stream with a compatible device connected to your PC, or you could select one of your colors from the screen and then copy the code onto the clipboard.

This handy feature lets you draw over everything displayed on the screen and then save the outcome using the hotkey you have set (alternatively, you could choose the default option).

Another benefit that ScreenHunter Pro offers ScreenHunter Pro is the ability to enhance the photo you've taken without opening an application from a third party.

You can pick specific parts of the image to alter the size or cropping in the way you like and add various types of objects, and alter the settings of some of them. With the integrated preview, you will always be able to tell whether the outcome is in line with your expectations or if you prefer to revert the modifications and attempt again.

Based on the type of video you recorded, depending on the type of capture you made, you can convert the file as an image (JPEG, PNG, PDF, GIF, BMP) or as a video (MP4 or FLV). The file's name and target folders can be changed according to your preferences, along with the video's quality and frame speed.

Overall, ScreenHunter Pro is bound to amaze you with its numerous capabilities and features, mainly because it can be used even by people without computer knowledge.

Beyond the flexibility of screen capture, ScreenHunter is a complete solution for editing images and unlimited screen recording of high quality.

ScreenHunter is the sole software that records and captures significant mouse points in Windows 10 simultaneously. With a wide array of functions, ScreenHunter is truly what you see is what you will get. User interfaces are user-friendly, distinctive, and quick to respond to.
