Tools   Applications
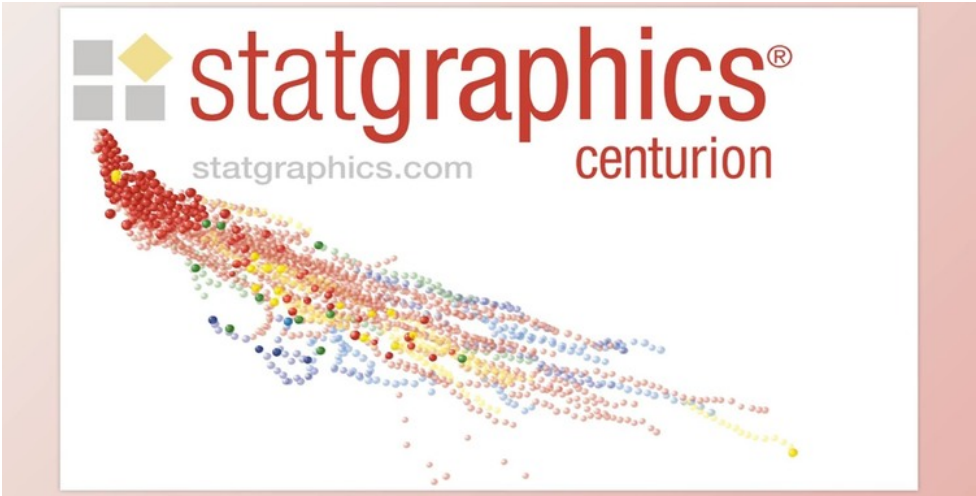

Statgraphics Centurion is a comprehensive Windows desktop application allowing statistical analysis, data visualization, and predictive analytics. It was created to bring the potential of data science available to all who gather data. The most recent version Statgraphics 19, features an intuitive GUI that doesn't require a sophisticated command language. The most helpful tool for practitioners is StatAdvisor which explains the findings of statistical analysis in a way that's appropriate for presentations to non-statisticians.

This is the Statgraphics value offer. It is a reference to the current business environment, which relies on data science for improvement. The intuitive user interface of Statgraphics 19 is unique in terms of power and sophistication, coupled with ease of use. Using Statgraphics 19 (r), you can easily create the procedures that will yield successful results. It provides the statistics tools you need to achieve excellence, increase understanding, and meet essential business goals. The goal is to improve the performance of systems to ensure efficiency and quality and improve best practices, procedures, and policies that result in cost-saving efficiencies and control. You can achieve success by focusing on quality knowledge, understanding, and performance throughout your company.

Lift operations climb towards the apex before reaching the summit together with Statgraphics analysis of data sciences. Find solutions to the most challenging problems. Remove doubt, move forward confidently, and find the way to achieve the success you desire in all aspects of your business's mission.

Statgraphics 19 contains more than 290 statistical methods and other features, including recent data visualization and predictive analytics, machine learning, and data mining updates.

Statgraphics Centurion Great Features:

Data visualization

Get the entire image and gain new insight when you visualize your data. Version 19 comes with 28 interactive Statlets that assist in analyzing data. By manipulating the controls of the toolbar, any changes can be seen dynamically. With Statgraphic's superior graphics capabilities, you will never miss a thing!

R Interface

Statgraphics can now be integrated with R, allowing users to extend their capabilities with Statgraphics Centurion 19. Through this interface, you will be able to benefit from an effortless integration of R developers as well as Statgraphics users. Data scientists who work in R can now communicate their work to others across the organization, accelerating the transfer of information that can be used for action.

Python Interface

Statgraphics 19 adds a new interface for Python, a high-level programming language. It is extremely popular with business analysts, scientists, and anybody wishing to create specialized data study methods. It is easy to move data between different systems and execute Python scripts inside Statgraphics.

StatAdvisor(tm)

StatAdvisor StatAdvisor makes statistical output accessible to people who aren't professionals in statistics. It gives the critical knowledge that can be gleaned from every output table, describing the data's importance (or lack thereof). StatAdvisor output is ideal for pasting into a report you can distribute to others.

Quality Management and Improvement

Quality improvement is simple. Need SPC? You can effortlessly take your high-quality projects to the next level. Manage multiple process variables simultaneously using the new dashboard, which sends alerts whenever unusual events occur. Explore our extensive range of tools for quality assessment and ability analysis control charts, gauge studies acceptability sampling, Monte Carlo simulation, and Lean Six Sigma.

Design of Experiments Wizard

Let the breeze flow through your projects. Reduce expenses. This DOE Wizard steps you through every step of the design procedure. Version 19 includes alias-optimized designs to the vast list of screening, reaction surface mixture, and RPD tests. The version also allows users to enhance existing tests by adding runs to maximize the efficiency of the design.
