

Winsoft Brotli v1.6 for Delphi & CB 6-12 Athens Full Source

2026-09-01 17:13:46

Winsoft Brotli is a data compression library designed for Delphi and C++ Builder environments, leveraging the Brotli library. This library is compatible with both Windows 32-bit and 64-bit systems, ensuring flexibility in application development. It is accessible for Delphi/C++ Builder versions 6 through 12 and Lazarus 3.0, catering to a wide range of development setups.

The complete source code is included within the registered version, empowering developers with transparency and customization options. With , developers enjoy royalty-free distribution rights for their applications, granting freedom in deployment without additional licensing concerns.
