INSTRUCTIONS

There are three ways to apply photo overlays.

1ST WAY: OVERLAYS IN ACTION

This method allows you to apply overlays quickly from any folder and even other sellers. You can change the hotkey F3 in the settings to make this action 1 with just one click. Double-click the overlay actions.atn file to load it in Photoshop. After installation is complete, click on the 'Window > Activities' button to access the Photoshop Actions panel. There are two actions available: JPEG Overlays and PNG. Overlay Action JPEG is different from Overlay Action PNG because JPEG uses the Screen Blend Mode. 2. Click on 'Overlays Action to play the action you want. 3. The Photoshop dialog box opens. It prompts you for the file to be selected. Select the file you wish to open and click 'Continue. The image will instantly be added to your Photoshop file. 4. If you wish, you can scale, rotate, or reflect the overlay. The action will create a layer and two adjustment layers by pressing Cmd (Ctrl), + Enter. Apply a black brush to the layer mask to conceal the image. In the correction, layers adjust the Levels or color so that the overlay is appropriate for the photo. 6. Show your customers the image, and they'll be delighted.

2ND WAY: Quickstart PSD Course

This allows you to work in photoshop files, where you can choose the overlay you want, making the layer visible. It's convenient as you can see the layer thumbnails within the layers of your image. However, it is not possible to open the file properly in certain versions of Photoshop. This function is not required and is provided as-is.

3RD WAY: DRAGG'N'DROP

1. Drag any image from the folder and place it into a Photoshop file. Screen Blend Mode is used for images with black backgrounds. Double-click the layer to change the blend mode. The layer styles window will then open. Next, change the blending mode. You don't need to do any changes for overlays with transparent backgrounds. If necessary, scale, transform, lower or increase the opacity of your overlay, and paint on it.
