Video Copilot Color Vibrance v1.0.7 (Win, Mac):

Achieving intense, bright colors can be challenging, so we developed a plug-in to simplify the process, allowing you to achieve HOT colors effortlessly. Our tool includes matte features that enable you to generate alpha channels from stock footage such as SHOCKWAVE, enhancing your ability to control compositing with ease.

Plug-in Features

- Easily add hot colorization
- Create alpha channels (unmultiply)
- Works on pre-matted clips
- Eliminate faded colors when using mask feathering
