Solid PDF to Word v10.1.18270.10854 Multilingual

2025-01-01 22:04:51

is a robust software designed to effortlessly convert text PDF files into DOCX or RTF formats with minimal user intervention. Its intuitive interface, reminiscent of the Office suite, facilitates easy navigation through its functions and options. Users can choose between manually selecting specific areas for conversion or swiftly converting entire documents with just a few clicks.

Solid PDF to Word enables users to browse through PDF pages, zoom in for detailed analysis, and even detect tables automatically. Precise page range selection or manual paragraph selection via mouse cursor further enhances customization. With various output options available, including destination folder definition, overwrite rules, and text reconstruction modes, **Solid PDF to Word** ensures that the converted text remains faithful to the source, maintaining its integrity and layout. Overall, it stands as a dependable and user-friendly solution for seamless PDF conversion to DOCX or RTF formats.

Key Features of **Solid PDF to Word**:

1. Basic and approachable user interface with a ribbon layout
2. Manual selection of conversion areas or quick conversion of entire documents
3. Ability to browse PDF pages and zoom in for detailed analysis
4. Automatic detection of tables
5. Precise page range selection or manual paragraph selection
6. Output options including destination folder definition and overwrite rules
7. Text reconstruction modes (flowing, continuous, exact)
8. Preservation or removal of headers, footers, and annotated text
9. Vector graphics reconstruction mode
10. List rendering options
11. OCR text recovery preferences

所有软件资源 100%安全 已检测 无病毒 无篡改
