The Complete Workshop from Installation to Mastery: Embark on a journey into the AI Art Generation with a seasoned portrait and travel photographer boasting a decade of experience in the art sphere!

Ideal for Artists, Content Creators, YouTubers, Photographers, and enthusiasts in both Tech and Art, this course is designed to empower you to master the AI Art Generation process. You'll gain comprehensive insights whether you're a beginner or looking to enhance your skills.

Here's what the course entails:

- Learn to set up Stable Diffusion on your PC for free, enabling local and private AI Art Generation without censorship.
- Explore numerous examples to understand each setting and parameter thoroughly.
- Create art using textual prompts with in-depth explanations.
- Generate new images using existing images as references.
- Craft images featuring your choice of faces, clothing, settings, and scenery.
- Exercise absolute control over poses and compositional elements.
- Transform sketches into art and merge photography seamlessly with AI art.
- Discover how to find, merge, and optimize photorealistic and animated models.
- Teach your favorite model new techniques.
- Utilize various upscale and upscaling methods effectively.
- Harness the power of extensions for optimal results.
- Employ inpainting techniques to generate or repair specific parts of an image.
- Create AI videos using Deforum.
- Learn batch processing to continue art creation even when you're away from your PC.

The course goes beyond practical skills, explaining critical terms in the AI Art community, including LORAs, Hypernetworks, Deforum, Textual Inversions, and more. Each concept is accompanied by examples, ensuring a comprehensive and engaging learning experience. Elevate your AI Art skills and take complete control of the creative process!
