Nu.wav Mopt Experiment Toolkit (WAV): MOPT Experiment Toolkit MOPT Experiment Toolkit sampler pack developed by the electronic duo of London and New York MOPT. It is comprised of loops, one-shots, as well as phrases that allow rapid and enjoyable experimentation by the blending of various styles, textures, and sources.

Utilizing the analog and digital synths as well as acoustic recordings MOPT expands its repertoire by exploring Latin and krautrock grooves and the modular IDM beats, avant-garde-inspired pianos, impressionistic tunes as well as bizarre synths, and melodic chord progressions. MOPT's London studio equipment plays an important role, incorporating the experimental synths of Soma Laboratory, Mutable Instruments, Instruo, or Makenoise as well as tape machines from Revox creating a distinct sound that is distinctive.

The sample packs are amazing and full of samples aimed at those who are in search of innovative and exciting music that expands into new expressive and aesthetic realms in music. Through this pack of samples, MOPT is inviting you to be part of their studio, whatever location you happen to be.

Included files

Loops

- Bass
- Drums
- Guitar
- Synths

One.Shots

- Drums
- FX
- Synth
- Tapes

Phrases
